Tool Search: Identity Mapping

The Ed-Fi Identity Mapping tool allows users to generate a report detailing Identity Mapping ID's from the Ed-Fi Identity Mapping table within Campus.

When Campus sends data to Ed-Fi, Ed-Fi sends back Identity Mapping IDs which Campus stores in the Identity Mapping table. Using this tool, users can now generate a report to review a detailed list of these Identity Mapping ID's by specific person(s) or for all people, and use this report to compare against the resource IDs existing in both the Campus database and within Ed-Fi.
