Comparing Versions of OLR

Last Modified on 11/06/2026 8:48 am CST

Two versions of Online Registration are available for districts.

- OLR Standard provides districts with the essential tools for parents to complete registration forms to enroll their children in school.
- OLR Prime adds additional functionality to OLR Standard to improve the efficiency of Online Registration for the district and collect additional student data.

Application data

	OLR Standard	OLR Prime

	OLR Standard	OLR Prime
Application Processing	x	x
Student Processing	x	x
Health Processing	x	x
Staff Notifications		x
Application queues		x
Registration dates by school		x
Update and merge list values in applications		x
Mass re-post applications		x

Application setup and customization

OLR Standard includes tools for setting up applications, such as drop list values, application preferences, and related reports.

OLR Prime includes these tools plus the following:

- Adding additional pleats to the application
- hiding the emergency contacts section
- allowing emancipated students to self-register
- force primary address selection from existing address data
- require e-signature of applications.

Integration with other Campus extensions

OLR Prime can be configured to collect key data for other Campus extensions.

- Tuition Billing
- Open Enrollment

Integration with these products is not available in OLR Standard.
