Enrollment Start Status Setup - Start here

Last Modified on 10/02/2026 8:17 am CDT

The Enrollment Start Status Setup tool allows districts to map local enrollment statuses to state enrollment statuses when local statuses are highly specific to a situation or district but still need to be included in state reports. For districts that use very granular enrollment statuses, this tool allows them to continue using those values while still reporting the state-mandated enrollment statuses.

Before you start

- Set Enrollment Status system preferences

How-to guides

- Create a new Start Status Type
- Mark a Start Status as inactive
- Delete a Start Status Type

Tutorials

- Enrollment Start and End Status Setup video

Explanation

- Custom Enrollment Start Status impacts on other Campus tools
