Fitnessgram Extract Editor

Report Logic

- Fitnessgram Extract reports all students in grades 3-12 that have an active enrollment on the extract date and were enrolled in the course(s) selected in the extract editor at any time during the reporting period.

- If a student was enrolled in multiple applicable courses during the reporting period, one record reports for each course in which they were actively enrolled. For example, if a student was enrolled in a PE course in the fall and another in the spring and the report is for the entire year, the student will have two records--one for each course. Also, if the student dropped a three term course in term 1, only one record reports.
- Non-instructional courses are NOT excluded.
- Courses with the State Report Exclude option selected on the Courses tab (Scheduling > Courses > Course) do NOT report.

The following types of students **Do Not** report:

- Students marked as Exempt (Student Information > Enrollment > Physical Fitness Exempt).
- Students marked as State Exclude or are in a grade/school/calendar marked as Exclude.
- Students who do not have a state ID.
