

Verification Summary (State)

Last Modified on 06/10/2025 9:32 am CDT

Tool Search: Verification Summary

The state-level Verification Summary tool analyzes data synchronization results between district and state-level records. The tool also contains the <u>Generating the Verification Summary Report</u>, which can be used to identify specific data issues.

District-level users should refer to the Verification Summary (District) article.

This tool is only available to district and state-level users connected to an Infinite Campus State Edition product. This page contains features available to state-level users.

This article includes the following topics:

<u>Verifying Data | Analyze Verification Results | Generate the Verification Summary Report | Related</u> <u>Tools</u>

Verific	cation Summar	у 🕁			System S	Settings	> Data Int	erchang	e Administra	ation > '		n Summary d Tools 🔨

Verification Summary Tool (state level)

The Verification Summary tool provides information on data inconsistencies in the following areas:

- Behavior Records
- Employment Records
- Employment Assignment Records
- Enrollment Records
- Graduation Records
- LEP Records
- Person/Identity Records
- LEP Records
- Test Scores

Infinite Campus recommends using this tool regularly to promote early identification of data inconsistencies between district and state levels, including missing and/or duplicate records. Summaries of existing and potentially erroneous records will be shown for both the district and

state levels. Users may wish to analyze the data returned by this report in conjunction with manually re-syncing data through the <u>Resync State Data (State)</u> tool.

Not all differences shown in the Verification Summary reports are failures. Some data may reflect expected differences.

The database tables which store information related to this tool are the *DISVerificationResult* and the *DISVerificationDifference* tables.

See the <u>Verification Summary Tool Rights</u> article for tool rights information.

Verifying Data

The state may have disabled use of this feature (through the <u>Verification Settings (State</u>) tool).

The Verification Summary tool can be used by a district to identify gaps, duplications and inconsistencies in student and staff data that might exist between the district and state-level databases.

In general, verifications are run on the current school year, though districts/states that sync to multiple school years may have the additional ability to <u>verify data from the previous/next school</u> <u>year</u>.

Verifying Data

For best system performance, Infinite Campus does not recommend selecting a large number of districts at one time. The maximum number of verifications that can be processed simultaneously is limited by the **Maximum Simultaneous Requests** setting of the <u>Verification</u> <u>Settings (State)</u> tool.

Verify Data for the Current School Year

- 1. Click the **Re-Verify** icon from the action bar. The Verify Data wizard will appear.
- 2. Select the **Objects to Verify** (described in the table below).
- 3. Select which **District**(s) to verify.
- 4. Click the Verify Selected Objects button. The verification process will begin.

Object	Description
All Objects	Verify all objects (see verification manner for each object, below).
Behavior	Verify <u>behavior records</u> exist in both the district and state, checking for differences in the following fields: Behavior Event, Behavior Type, Behavior Resolution Type, Behavior Role, Behavior Resolution, Behavior Incident GUID and the date in which the behavior event occurred.
Employment	Verify that <u>staff district employment records</u> exist in both the district and state, checking for differences in the record's Start Date and/or End Date.

Object	Description
EmploymentAssignment	Verify that <u>staff district assignment records</u> exist in both the district and state, checking for differences in the record's Start Date and/or End Date.
Enrollment	Verify that <u>student enrollment records</u> exist in both the district and state, checking for differences in the following fields: Grade Level, Service Type, Start Date, End Date, Start Status and/or End Status.
Graduation	Verify that <u>student graduation records</u> exist in both the district and state, checking for differences in the following fields: Diploma Date, Diploma Type, Diploma Type (BIE), Date First Entered 9th Grade and/or NCLB Cohort Year. Verification will only check graduation records of students with a high school enrollment in the verified year.
	For proper reporting of graduation records, all local high school grades must be <u>mapped to a state grade</u> that is matched to a federal NCES grade level of 9, 10, 11 or 12 in the stateGradeLevelDefinitions table.
LEP	Verify student LEP records exist in both the district and state, checking for differences in the following fields: Program Status, Identified, Expected Exit Date, Exit Date, First Year Monitoring, Second Year Monitoring, Parent Notified Date, Parent Declined.
PersonIdentity	Verify that <u>person/identity records</u> exist in both the district and state, checking for differences in the following fields: Last Name, First Name, Middle Name, Gender, Birth Date, SSN, Person GUID, Race/Ethnicity, State ID and/or Staff State ID.
TestScore	Verify test scores of <u>state published tests</u> exist in both the District and State Editions, checking for differences in the following fields: Date, Scale Score, Raw Score and Percentile. Only test scores associated with the verified year will be checked.

Processing time depends on a variety of factors, including bandwidth limitations, state-level settings and pending requests. The **Timestamp** column of the Verification Results table will display a "(!)" after an existing date or an N/A value for the column of the requested verification while the process completes.

261	Hickman County	99.18%											

Verification Summary Tool (state-level view)

Verification Progress

All verification requests go through four stages: **Pending, Requested, Processing** and **Complete**.

Requests begin in the pending stage, where the <u>Task Scheduler</u> tool is used to throttle the number of verifications run at a time. If the maximum number is reached, the remaining requests are held in the "Pending" status until space opens up. The status moves to "Processing" once the data is received. When all data is received and the request is done, the status is "Complete."

A user may need to manually refresh the tool to see completed results. To refresh results, click the Verification tool in the Index or the Verification Summary tab. Then select the appropriate entry in the DIS Verification Results editor to open the table and review results.

The Verification Summary tool only displays the most current results; it does not log historical results. Therefore, a user may wish to use the Verification Summary Report button to generate a copy of verification data that can be saved for historical purposes.

Verifying Data from the Previous or Next School Year

Some states may have the ability to verify data from the previous and/or next school years, if it currently allows syncing of data from multiple school years. The <u>Syncing Data from Multiple</u> <u>School Years</u> page should be reviewed before attempting to verify data from the previous and/or next school year.

If the state allows data to sync from the previous and/or next school year, this tool will allow verification of that data. The user should set the **Year** field of the Campus toolbar to the appropriate year and follow the <u>standard steps for verifying data</u>.

Analyze Verification Results

The Verification Results table displays results of the last verification, regardless of whether it was requested by the district or the state. Results are displayed in a statistical format and include all schools in the district. Select the district name in the DIS Verification Results editor to view the latest set of results.

Not all differences shown in the Verification Summary reports are failures. Some data may reflect expected differences.

Completion Status of Verification

Hovering the mouse over the link in the **Timestamp** column will indicate the current status of the verification.

If the verification has been requested and/or is still processing, an exclamation point "(!)" will appear in the **Timestamp** column. Hovering the mouse over it will indicate a status of "Pending" and the date/time the request was initiated.

Reviewing Specific Data Errors

The details of completed verifications are available by selecting a link from the **Timestamp** column of the Verification Results editor.

Link to Verification Detail Report

Selecting a hyper-linked time from the Timestamp column will generate a report with summary information and the specific records identified as erroneous. This report is broken into the following three sections.

Header/Syncing Rules

The top of the report describes the logic used to compare existing records between state and district as well as syncing rules to consider when analyzing report data.

0902 Butte School District #1 District Generated on 10/05/2012 02:57:41 PM Page 1	Enrollment Verification Report Comparison of District Enrollment Data With State Data Butte School District #1 Verified: 02/08/2012 10:14
Enrollment Verification Results	
he Enrollment Verification will compare all enrollment records olumn of the report may suggest a reason related to record dit	existing at the district and state in the school year selected for verification. The Details fferences.
Enrollment Sync Rules	
ocal and/or state-level settings may intentionally prevent sync	ing of certain enrollments. The following criteria can prevent enrollments from syncing:
 Individual Enrollment marked as state exclude Grade Level marked as state exclude System Preference - Enrollment Overlap Behavior System Preference - Accept State Excluded Grade Unmapped State/Regional Grade Levels 	
The success of Enrollment object syncing depends on the succ	essful syncing of these parent objects:
1. District 2. Reporting Entity*	
3. School 4. Calendar	
5. ScheduleStructure 6. StructureGradeLevel	
7. PersonIdentity

Generate Verification Summary Report

To ensure that the Verification Summary Report reflects the most current data available, Infinite Campus recommends generating it directly after running a new verification.

To generate a report with the results of the last verification:

- 1. Click the **Verification Summary Report** icon located in the action bar. The Verification Summary Report editor will appear.
- 2. Select the applicable **Objects to Include in the Report** (described in the table below).
- 3. Select the appropriate style from the **Format** of the report as well as all applicable **Districts to Include in the Report**.
- 4. Flag the **Show Districts with No Results** checkbox to show the selected districts, even if they have no verification results.
- 5. Flag the **Include Calendar Totals** checkbox if enrollment results should additionally include a detail section where enrollment totals are shown by the school calendar to which they relate.
- 6. Once all appropriate options have been selected, click the **Generate Report** button.

Object	Description
All Objects	Verify all objects (see verification manner for each object, below).
Behavior	Verify <u>behavior records</u> exist in both the district and state, checking for differences in the following fields: Behavior Event, Behavior Type, Behavior Resolution Type, Behavior Role, Behavior Resolution, Behavior Incident GUID and the date in which the behavior event occurred.

Object	Description
Employment	Verify that <u>staff district employment records</u> exist in both the district and state, checking for differences in the record's Start Date and/or End Date.
EmploymentAssignment	Verify that <u>staff district assignment records</u> exist in both the district and state, checking for differences in the record's Start Date and/or End Date.
Enrollment	Verify that <u>student enrollment records</u> exist in both the district and state, checking for differences in the following fields: Grade Level, Service Type, Start Date, End Date, Start Status and/or End Status.
Graduation	Verify that <u>student graduation records</u> exist in both the district and state, checking for differences in the following fields: Diploma Date, Diploma Type, Diploma Type (BIE), Date First Entered 9th Grade and/or NCLB Cohort Year. Verification will only check graduation records of students with a high school enrollment in the verified year.
	For proper reporting of graduation records, all high school grades must be <u>mapped to a state grade</u> that is matched to a federal NCES grade level of 9, 10, 11, or 12 in the stateGradeLevelDefinitions table
LEP	Verify student LEP records exist in both the district and state, checking for differences in the following fields: Program Status, Identified, Expected Exit Date, Exit Date, First Year Monitoring, Second Year Monitoring, Parent Notified Date, Parent Declined.
PersonIdentity	Verify that <u>person/identity records</u> exist in both the district and state, checking for differences in the following fields: Last Name, First Name, Middle Name, Gender, Birth Date, SSN, Person GUID, Race/Ethnicity, State ID and/or Staff State ID.
TestScore	Verify test scores of <u>state published tests</u> exist in both the District and State Editions, checking for differences in the following fields: Date, Scale Score, Raw Score and Percentile. Only test scores associated with the verified year will be checked.

The report will generate a summary of verification results similar to those appearing in the Verification Results editor. For example, the Enrollments page of the report might look like this (PDF example):

Verification Summary Report (enrollments example)

Verification Results Table Fields

The following information is available on columns within the Verification Results table.

Column	Summary of Data									
Object	The type of data object analyzed.									
Accuracy	The percentage of accuracy of the verification results. Clicking on the Legend link will display the key related to color-coding used in this column. Not all differences shown in the Verification Summary reports are failures. Some data may reflect expected differences.									
	Color Coding Legend Accuracy >= 99.5% Verification Results fo		= no reco	ords to veri	fy					
	Object	Accuracy Timestamp			Total Records		Total E			
		Legend				ct At State				
	Behavior	82.38%	06/13/2011 13:27:03 (!)		754	913	161			
	Employment	55.96%	06/13/2011 13:26:33 (!) 06/13/2011 13:27:05 (!)		1071 4366	1911 4371	842 8			
	EmploymentAssignment Enrollment	99.75%	07/22/2011 08:55:04 (!)		4300	1620	4			
	Graduation	74.07%	07/22/2011 08:52:04 (!)		25	27	7			
	LEP		06/13/2011 13:28:05	0	0	0	0			
	PersonIdentity	98.55%	06/13/2011 13:28:05 (!)	6083	6019	6068	88			
	TestScore		06/13/2011 13:28:05	0	0	0	0			
	 Verification Accuracy Legend Green - Accuracy rate is in the range of 99.5 - 100% Yellow - Accuracy rate is in the range of 99 - 99.4% Red - Accuracy rate is in the range of 0 - 99% Gray - No records to verify for the object The accuracy value is derived from the following calculation and is expressed as a percentage: (Distinct Records - Total Errors) / Distinct Records = Accuracy %									

Column	Summary of Data						
Timestamp	The date and time at which the verification last ran at either the district or state- level.						
	Results always reflect the most recent generation. Clicking on the timestamp link will generate a PDF report of the verification results for the selected object.						
(Total Records) Distinct	This column is a sum of the total number of records currently existing at the district, plus the total number of missing records that should exist at the district.						
	Total Records: At District + Missing: At District = Distinct						
(Total Records) At District	This column is the total number of records currently existing at the district level.						
(Total Records) At State	This column is the total number of records currently existing at the state level.						
Total Errors	This column is the sum of all missing records and differences. Missing: At State + Missing: At District + Differences = Total Errors						
(Missing) At State	The total number of district-level records that do not exist at the state.						
(Missing) At District	The total number of state-level records (related to the district) that do not exist at the district.						
Differences	This is a count of the records existing at the district and the state where values in a key field differ. It is expressed as a total number of missing records subtracted from the total number of errors.						
	Total Errors - (Missing: At State + Missing: At District) = Differences						

Related Tools

Users may wish to analyze the data returned by this report in conjunction with the manual resync process of the <u>Resync State Data</u> tool.

District-level users may wish to view the <u>Verification Summary (District)</u> information.
