

ISBE 504 Extract

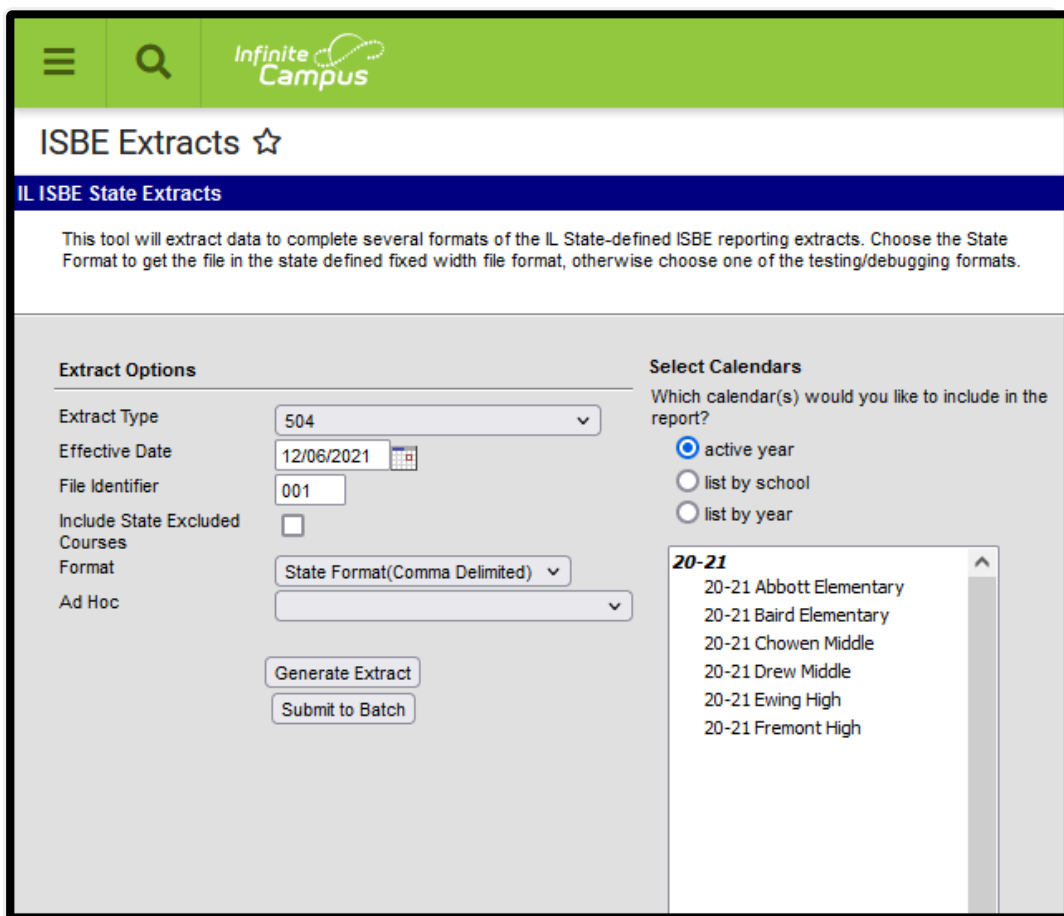

Last Modified on 03/11/2024 8:45 am CDT

[Report Logic](#) | [Report Editor](#) | [Generate the Report](#) | [504 Extract Layout](#)

Classic View: IL State Reporting > ISBE Extracts > 504

Search Terms: ISBE Extracts

The Section 504 Extract reports students who have an active primary enrollment in the selected calendar as of the report date where an active Section 504 record exists (Student Information > Program Participation > Section 504). One record reports for each calendar of enrollment.

The screenshot shows the 'ISBE Extracts' tool interface. At the top, there's a green header with the Infinite Campus logo and a search icon. Below the header, the title 'ISBE Extracts' is followed by a star icon. A blue bar indicates 'IL ISBE State Extracts'. A descriptive text states: 'This tool will extract data to complete several formats of the IL State-defined ISBE reporting extracts. Choose the State Format to get the file in the state defined fixed width file format, otherwise choose one of the testing/debugging formats.'

The main area is divided into two sections: 'Extract Options' and 'Select Calendars'.

Extract Options:

- Extract Type: 504 (dropdown)
- Effective Date: 12/06/2021 (calendar icon)
- File Identifier: 001 (text input)
- Include State Excluded Courses: ☐
- Format: State Format(Comma Delimited) (dropdown)
- Ad Hoc: (dropdown)

Buttons at the bottom: 'Generate Extract' and 'Submit to Batch'.

Select Calendars:

Which calendar(s) would you like to include in the report?

- ☒ active year
- ☐ list by school
- ☐ list by year

A list of calendars for the 20-21 school year is shown:

- 20-21 Abbott Elementary
- 20-21 Baird Elementary
- 20-21 Chowen Middle
- 20-21 Drew Middle
- 20-21 Ewing High
- 20-21 Fremont High

ISBE Section 504 Extract

Report Logic

One record reports for each student who has a Primary Enrollment in the selected calendar AND meets one of the following:

- The student has a 504 record with an end date on or after the Effective Date entered on the report editor, OR
- The student has a 504 record that does not have an end date and the start date of the 504

record is on or after the student's enrollment start date.

One record reports for each calendar of enrollment. When the student has multiple enrollments, each with unique RCDTS Serving Schools and Home Schools, one record reports. For students whose 504 has a future end date, the extract reports the current 504 record with a blank end date.

A record reports even when the student is no longer enrolled as of the entered Effective Date. This captures students who may have had an active 504 record prior to the Effective Date in the selected calendar and includes those students who were enrolled, ended enrollment (withdrew) and re-enrolled in the same calendar.

Report Editor

Field	Description
Extract Type	Selection determines the extract that is generated. For this instance, select the 504 option.
Effective Date	Entered date is used to return current enrollments for the report. This field automatically populates with the current date, but can be changed by entering a new date in <i>mm/dd/yyyy</i> format or by clicking the calendar icon to select a date. This date is required in order to generate the report. <ul style="list-style-type: none"> • If an enrollment record has an end date before the effective date, that record is not included • If an enrollment record has an end date after the effective date or does not have an end date, that record is included.
File Identifier	Indicates the number attached to the end of the file name and is used to differentiate the file from other files generated.
Format	Determines how the report generates. Use the State Format (Comma Delimited) when submitting the report to the state. Use the HTML or Tab Delimited option when reviewing data prior to state submission.
Ad hoc	Select a saved ad hoc filter to use when generating this report. Only those students included in the filter are returned on the report if they meet the reporting requirements.
Calendar Selection	At least one calendar needs to be selected for the report to generate. Calendars can be chosen by Active Year , by School or by Year . If a calendar is selected in the Campus toolbar, that calendar is automatically selected.
Report Generation	The report can be generated immediately using the Generate Extract button. When there is a larger amount of data chosen (several calendars, large date range, etc.), use the Submit to Batch button, which allows the user to choose when the report is generated. See the Batch Queue article for more information.

Generate the Report

1. Select **504** from the **Extract Type** field.
2. Enter the **Effective Date** for the report.
3. Enter a **File Identifier**. This is a three digit number attached to the file name used to differentiate itself from other ISBE Demographic and Enrollment Extract files generated.
4. Select which **Format** to generate the report in. To preview information prior to submission to the state, use the HTML format. When submitting data to the state, use the State Format (Comma Delimited).
5. If desired, select an **Ad hoc Filter** from which to pull the student set.
6. Select which **Calendars** to include within the report.
7. Select the **Generate Extract** button or use the **Submit to Batch** option. The report displays in a separate window in the designated format.
