## Report Logic

Each attribute within each group reports a record. Records should be sorted by group and by calendar. Calendar and state exclude will report.

A record reports for each day with a Date Event, for each State Grade. Duplicate records are not reported for days with multiple events.

## Assessment Group Attribute Codes

## Calendar Group Attribute Codes

For Day Events of DBLZZARD, a record reports for each Day with that Event. A separate record reports for each Grade Level that is not marked as State Exclude. If an Attendance Pattern is entered, a record reports for each Attendance Pattern entered for a Grade Level.

For all other attributes, for each Day Event of the reported attribute, each grade level not marked state exclude reports a record, and within that a record reports for each unique Attendance Pattern.

## Generating the Extract

1. Select the Organization General Information (DN) **Extract Type**.
2. Use the **Group** field to indicate the attribute for which to generate a report. Use the **Ctrl** key to select one, or more, attributes. The attribute within each group reports a record. Records are sorted by group and by calendar.
3. Select the appropriate **Reporting Period** for the selected Group.
4. Enter the desired **Date Range** in *mmddyyyy* format or by clicking the calendar icons and selecting dates. Indicates date range from which the report will extract data.
5. Select the extract **Format**. For submission to the state, select the State Format (Fixed width) option. To review data before submission to the state, select any of the other available formats.
6. Select which **calendar(s)** to include within the extract. Information regarding the selected group for the school(s) in the selected calendar(s) will appear in the report. Calendars may be listed by active year, school or year by selecting the appropriate radio button.
7. Click **Generate Extract** to generate the report in the indicated format or **Submit to Batch** to schedule when the report will generate. If generating multiple extracts at a time, requests can only be submitted to the Batch Queue.

Users have the option of submitting a Organization General Information (DN) report request to the batch queue by clicking **Submit to Batch** instead of Generate Extract. This process allows larger reports to generate in the background, without disrupting the use of Campus. For more information about submitting a report to the batch queue, see the [Batch Queue](#) article.
