Search Terms: GSSM Report

The Golden State Seal Merit (GSSM) Report lists those students who have achieved the Golden State Seal and receive a diploma with that merit seal on it.

GSSM Report

Report Logic

One record for each student who meets the requirements of the report prints.

Posted transcript records are necessary, as follows:

- A transcript must include two separate records of the same course, with the actual term, the student term and the end term for each record in which the student received a grade.
- Grade level (state grade levels) in which the course was taken must be 09, 10 or 11.
- To be considered, the grading task must be the Semester grade, or similar.
- The GSSM Category needs to be assigned on the Course.
- A student must have received a State Score of B, B+, A-, A, A+.

For ELA, Mathematics or Science, students must receive a state grade of B+ or higher.

For US History, students must receive a grade of B or higher.

Assessments with any passing score can be used to meet the requirements for ELA and Math IF and include the following:

- Subject of LangArts or Math
- State Test Code of 107: Golden State Examinations

If a student meets the requirements for one course category and also meets the requirements of the assessment, the category shows as met, as well as having met Additional 1 (or 2). For example, a student's passing score on an assessment meets GSSM, as does their semester grade on the course. The student reports in the extract with an X for the category and an X for the additional category.

Courses can be tied together using Schedule Rules of SAME TEACHER or BIND. This is used when course names are different (Math 1A, Math 1B, etc.).

Report Editor

Field	Description
Reporting Date	Indicates the date of the report. This field displays the current date and includes all students enrolled on this date.
Report Type	Indicates which report is being generated. • Summary Only includes whether the student qualifies for GSSM, the total count of qualification, and the categories for qualification. • Summary with Student Detail includes the information above and also in which courses the student met the qualification.
Format	Determines how the report generates. Select PDF or XML (state format).
Legal Name and Gender	When marked, the student's legal name reports.
Report only test and course grades that could meet a GSSM Requirement	When marked, only those courses or tests where the student received a score of B, B+ or Passing are included.

Field	Description
Report only students with a specific number of GSSM Requirements Met	When marked, students who have met the selected value for GSSM requirements are included. Select All or a value of 1-6.
Ad hoc Filter	Select which students to include in the extract by choosing a filter that was created in the Filter Designer.
Calendar Selection	Select the calendar of enrollment from which to pull student data. Calendars can be chosen by the active year, by the school name or by the year. Only one calendar can be selected at a time.
Report Generation	Choose the Generate Extract to display the results of the chosen items immediately. Choose the Submit to Batch option to generate the report at a specified time. This option is helpful when generating large amounts of data.

Generate the GSSM Report

1. Enter the desired **Reporting Date**.
2. Select either the **Summary Only** or the **Summary with Student Detail Report Type**.
3. Select the desired **Format** for the report.
4. If desired, mark the **Legal Name and Gender** checkbox.
5. If desired, mark the **Report only test and course grades that could meet a GSSM Requirement** checkbox.
6. If desired, mark the **Report only students with a specific number of GSSM Requirements Met** checkbox.
7. If appropriate, select an **Ad hoc Filter**.
8. Select the desired **Calendar** from which to report students.
9. Click the **Generate Extract** button or the **Submit to Batch** button.

Summary Only - XML Format

Report Layout

Data Element	Description	Type, Format, Length	Campus Database Location	Campus UI Location
Summary Information				
Student Name	Reports the student's name in Last Name, First Name order. If the Legal Name and Gender checkbox is marked, the legal first and last name report, if that information is populated for the student.	Alphanumeric, 60 characters	Identity.firstName Identity.legalFirstName Identity.lastName Identity.legalLastName	Census > People > Demographics > Person Identifiers > Last Name, First Name Census > People > Identities > Identity Information > Protected Identity Information > Legal Last Name. Legal First Name
Qualifies for GSSM	Reports a value of Y or N if the student qualifies for GSSM.	Alphabetic, 1 character	Calculated Value	Calculated Value

Data Element	Description	Type, Format, Length	Campus Database Location	Campus UI Location
Qualification Count	Reports the total number of qualifying courses or assessments in which the student qualified for GSSM.	Numeric, 1 digit	Calculated Value	Calculated Value
US History	Reports an X if the student met the GSSM requirements for US History.	Alphabetic, 1 character	Calculated Value	Calculated Value
ELA	Reports an X if the student met the GSSM requirements for ELA.	Alphabetic, 1 character	Calculated Value	Calculated Value
Math	Reports an X if the student met the GSSM requirements for Math.	Alphabetic, 1 character	Calculated Value	Calculated Value
Science	Reports an X if the student met the GSSM requirements for Science.	Alphabetic, 1 character	Calculated Value	Calculated Value
Additional	Reports an X if the student met the GSSM requirements for additional work.	Alphabetic, 1 character	Calculated Value	Calculated Value
Additional	Reports an X if the student met the GSSM requirements for additional work.	Alphabetic, 1 character	Calculated Value	Calculated Value
Student Detail Information				

Data Element	Description	Type, Format, Length	Campus Database Location	Campus UI Location
Student Name	Reports the student's name in Last Name, First Name order. If the Legal Name and Gender checkbox is marked, the legal first and last name report, if that information is populated for the student.	Alphanumeric, 60 characters	Identity.firstName Identity.legalFirstName Identity.lastName Identity.legalLastName	Census > People > Demographics > Person Identifiers > Last Name, First Name Census > People > Identities > Identity Information > Protected Identity Information > Legal Last Name. Legal First Name
Requirement Applied To	Displays the category or course type to which the GSSM requirement counts. This is based on the selected GSSM Category field on the Course.	Alphanumeric, 15 characters	Course.gssmCategory	Scheduling > Courses > Course > Course Info > GSSM Category
Met Requirement	Indicates whether the student met the requirement based on posted Transcript grades.	Alphabetic, 1 character Y or N	Calculated Value	Calculated Value
Course	Reports the name of the course name and number in which the student met the requirement.	Alphanumeric, 30 characters	Course.name Course.number	Scheduling > Courses > Course > Course Info > Name, Number

Data Element	Description	Type, Format, Length	Campus Database Location	Campus UI Location
Test Name	Reports the name of the assessment for which the student met the requirement.	Alphanumeric, 30 characters	Test.name	Assessment > Test Setup > Name Student Information > General > Tests
Type	Reports either Grade (if the requirement was met by a course) or Assessment (if the requirement was met by an assessment)	Alphabetic, 15 characters	N/A	N/A
Date	Lists the date the requirement was met.	Date field, 10 characters MM/DD/YYYY	Transcript.date Assessment.date	Student Information > General > Tests > Date Student Information > Counseling > Transcript > Date
Score	Reports the score the student received in the course, or reports a value of 1 for passing the assessment.	Alphanumeric, 3 characters	Test.score Transcript.score	Student Information > General > Tests > Score Student Information > Counseling > Transcript > Score
