Report Logic

Multiple records can report for a section.

- A record reports when the teacher is marked as the 01: Teacher or Record at Scheduling > Courses > Section > Staff History > Role = 01: Teacher of Record. Only one teacher reports. If no Teacher of Record Role exists, the current primary teacher or the most recent primary teacher, if the section has ended, reports as of the report generation effective date.
- A record reports for each course section where the Semester is unique.
- A record reports for each course that reports the [PIMS Course Template](#).
- A record reports for each unique Location Code Override that are assigned to the students scheduled into those courses. When the Location Code Override field is not populated for the students, the Location Code reports from the Alt School Number or State School Number field.

Report Editor

The following provides details on the available fields for the PIMS Course Instructor Template.

Field	Description
Extract Type	Determines the type of PIMS Extract being generated.
Reporting Period	Indicates the time of year for which the extract is being generated.
Effective Date	Entered date causes the extract to report all students actively enrolled as of that date and/or all data as of this date. This date entered is considered the end date of the reporting period, unless it is a snapshot extract.
Prior Reporting Date	Indicates staff who were employed between the entered date and the Effective Date/Reporting Date.
Format	Determines how the extract generates. Extracts can be generated in State Format (comma delimited) or HTML. Use the HTML format for reviewing and verifying data prior to submission to the state. Use the State Format for submitting the data to the Department of Education.
Staff Ad hoc Filter	Select an existing ad hoc filter from which to report school staff. Only those staff included in the Census/Staff Data Type Filter and who meet the reporting population are included in the extract.
Calendars	At least one calendar must be selected when generating a PIMS extract. Calendars can be selected by the Active Year, by School or by Year. If a calendar is chosen in the Campus toolbar, that calendar is automatically be selected.

Field	Description
Report Generation	To generate the report immediately, use the Generate Extract option. To choose when the report generates, use the Submit to Batch option. Submit to Batch is useful when generating the report for several calendars or for larger amounts of data being reported. See the Batch Queue article for more information.

Generate the Course Instructor Template

1. Select **Course Instructor Template** from the **Extract Type** from the dropdown list.
2. Select the desired **Reporting Period**.
3. Enter the **Effective Date** of the extract in *mmddyy* format or use the calendar icon to select a date.
4. Enter the **Prior Reporting Date** of the extract in *mmddyy* format or use the calendar icon to select a date.
5. Select the **Format** of the extract.
6. Select a **Staff Ad hoc Filter**, if desired.
7. Select the appropriate **Calendar(s)** from which to include data on the extract.
8. Click the **Generate Extract** button or the **Submit to Batch** button, if available. The extract displays in the selected format.
