Report Editor

The following fields are available for entry on the Local Health Department Report.

Field	Description
Effective Date	Entered date returns only those students actively enrolled on that date. Dates are entered in <i>mmdyy</i> format or can be chosen by clicking the calendar icon.
Format	The Local Health Department Report can be generated in either HTML or CSV. Data returned on the HTML or Comma Delimited output is then entered into a F-04002 form (available from DPI) for each school.
Ad hoc Filter	Selecting an Ad hoc Filter returns only those students who are included in that filter and meet the reporting requirements of the report itself.
Calendar Selection	<p>Indicates from which calendar of enrollment information is reported. The calendar chosen in the Campus toolbar is automatically selected. The report can be generated for one school at a time, or a set of schools at a time (all elementary schools, for example). At least one calendar needs to be selected. Calendars can be listed by the Active Year, by School name or by Year.</p> <p>Note that when more than one calendar is selected, the report must be submitted to the batch for generation. It is recommended that users do not select all schools in the district at one time.</p>
Report Generation	The report can be generated immediately using the Generate Extract button. When there is a larger amount of data chosen (several calendars, large date range, etc.), use the Submit to Batch button, which allows the user to choose when the report is generated. See the Batch Queue article for more information.
