**Classic View:** System Administration > Ed-Fi

**Search Terms:** Ed-Fi

Ed-Fi is a data interchange standard and framework created by the Dell Foundation to allow K-12 educational institutions to consolidate and analyze data, and communicate this data with each other. It also provides a dashboard toolkit from which users can create dashboards to analyze data from the student, district, state (and eventually national) level.

The following information pertains to Michigan school districts only.

## Ed-Fi Information
