

# Building Delivery Model (Ohio)

Last Modified on 02/14/2023 3:36 pm CST

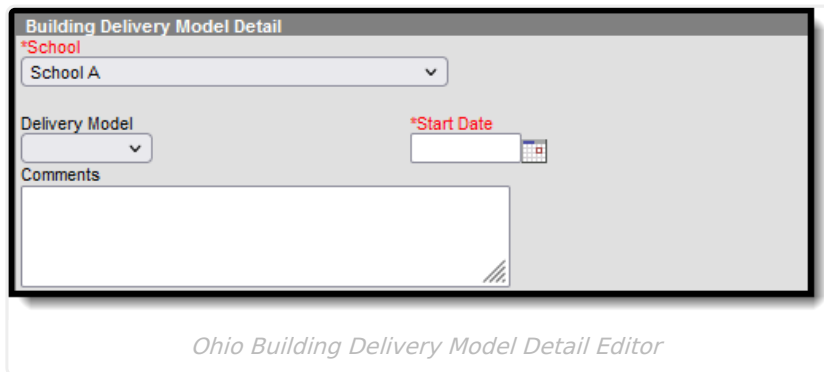

## Building Delivery Model

**Classic View:** System Administration > Resources > School > Building Delivery Model

**Search Terms:** Building Delivery Model

## Building Delivery Model

The Building Delivery Model is used to determine the way in which instruction is delivered in the selected building. A Building Delivery Model should only be selected if it is different than the District Delivery Model. A record is saved for each delivery model created. If the Delivery Model differs from the District Delivery Model, be sure that an additional record for the building is reported.

The screenshot shows a web form titled "Building Delivery Model Detail". It contains the following fields:

- \*School:** A dropdown menu with "School A" selected.
- Delivery Model:** A dropdown menu.
- \*Start Date:** A date input field with a calendar icon.
- Comments:** A large text area.

Below the form, the text "Ohio Building Delivery Model Detail Editor" is displayed.

## School

Use the drop-list to select the school for which the Delivery Model is being set.

## Delivery Model

Use this drop-list to select the way in which instruction is delivered to students.
