Tool Search: Assessment Center

[Create a New Assessment](#) | [Test Information](#) | [Test Type](#) | [Display Settings](#) | [Score Fields](#) | [Result / Proficiency Statuses](#) | [Child Tests](#) | [Teacher-Scored Assessments](#) | [Copy](#) | [OneRoster Integration](#)

The Assessment Center provides schools with the ability to create and manage assessments administered to students for district (local), state, and national tests. The **Test Detail** tool is used to define the necessary assessment details including:

- Test Information
- Test Type
- Display Settings
- Score Fields
- Result / Proficiency Statuses
- Child Tests

Select a saved assessment to navigate to the Test Detail screen to copy or edit the assessment. Select the 'New' button at the bottom of the Assessment Center homepage to add a new assessment.

Before adding a new test, use the **Search Tests** field to confirm it has not already been added. There is an option to include **archived** tests in the search. A test may be archived if it should no longer be available to be administered to students. Archived tests can be reactivated for use by deselecting the Archived checkbox and clicking Save.

Create a New Assessment

Done	Task
	Select the 'New' button at the bottom of the Assessment Center homepage to navigate to the Test Detail page.
	Enter Test Information . The 'Name' field is required . Other fields should be completed as needed.
	Mark the radio button for the appropriate Test Type and select the relevant options for that type.

	<p>Determine whether information for this test should display on the portal or on transcripts using Display Settings.</p> <ul style="list-style-type: none"> • Check the 'Mark as Restricted' option if the results should <u>not</u> display on the Student Assessment screen. • Designate the User Groups with the tool rights to access the test (if 'Mark as Restricted' is selected).
	<p>Select which Score Fields will display on the Student Assessment page. Score Fields can be added or modified (designate as required, hide, change sequence, etc.) under the Test section of the Core Attribute / Dictionary</p>
	<p>Indicate any Result / Proficiency Statuses that should be associated with the test. They can be defined per test to locally categorize and label test scores.</p>
	<p>Add Child Tests within a Parent Test.</p>
	<p>Select the appropriate save option: Save, Save & New, or Save & Next.</p>

Test Information

The Test Information section provides basic information about the assessment.

▶ [Click here to expand...](#)

Test Type

The Test Type section is used to indicate whether the assessment is a District, State, or National Test.

▶ [Click here to expand...](#)

Display Settings

The Display Settings section is used to determine if and how the information for this test should appear on the portal or in transcripts. The level of access allowed to certain User Groups can also be indicated here.

▶ [Click here to expand...](#)

Score Fields

The Score Fields section is used to select which score fields display on the [Student Assessment](#) page. They can be added or modified (designate as required, hide, change sequence, etc.) in the [Attribute Dictionary](#).

▶ [Click here to expand...](#)

Result / Proficiency Statuses

The Result / Proficiency Statuses section can be used to add the statuses that should be available for the assessment.

▶ [Click here to expand...](#)

Child Tests

The Child Tests section is used to nest child assessments within a test to be scored independently.

▶ [Click here to expand...](#)

Teacher-Scored Assessments

Only district-level assessments can be scored by teachers.

OneRoster Integration

The OneRoster API allows third-party systems (such as an LMS) to retrieve data from Campus, if the system has been given the correct credentials. The data that can be gathered through this API includes assessment, roster and section data, as well as assignments, grades, and scores, if enabled. This API allows districts to integrate their third-party program more simply with Campus.
