Curriculum you shared is indicated in the Library.

When you share curriculum, the version in the library is separate from the one you have. Changes you make to your curriculum will not be reflected in the version in the library. Likewise, when teachers use your curriculum from the library, any changes they make do not affect the library version.

Update Shared Curriculum

Currently, the only way to update shared curriculum is to make changes to your version and then share again. Remove the version you shared previously to make sure other teachers are finding the most up-to-date version.

Remove Curriculum

1. Open the Curriculum Library and locate your curriculum. The **Only Curriculum Shared By Me** filter in the Add Filters menu may be helpful in finding your curriculum.
2. Click the  button.
3. In the message that displays, indicate if you want to **Remove Folder and Resources**, which removes the folder and anything inside it, or **Remove Folder**, which only removes the folder - any curriculum within the folder would no longer be grouped together. In the future, items would have to be removed individually.
4. Once you choose an option, curriculum is removed from the library.

Removing content removes it from the library, but teachers who have added it from the library still have access to their own versions. Likewise, you'll still have the original version of the curriculum you shared in your Curriculum List.
