

Early Education Export (Minnesota)

Last Modified on 04/29/2024 10:24 am CDT

[Report Logic](#) | [Generating the Extract](#) | [Report Layout](#)

Tool Search: Early Education Export

The Early Education Export generates a report of students who have Early Education data in Enrollment and do not have an Early Education Program. The report extract will generate in a format that can be used in the State/Federal Program Updater to mass create programs for students.

The screenshot shows the 'Early Education Export' tool interface. At the top, there's a breadcrumb trail: 'Reporting > MN State Reporting > Early Education Export'. Below this is a header 'Early Education Export ☆' and a descriptive text box stating: 'This tool will generate a report of students who have Early Education data in Enrollment and do not have an Early Education Program. The report extract will generate in a format that can be used in the State/Federal Program Updater to mass create programs for students.'

The main interface is divided into two columns. The left column, titled 'Extract Options', contains:

- 'Effective Date' with a date picker.
- 'Ad Hoc Filter' with a dropdown menu.
- 'Select Grades' with a list box containing 'All Grades', 'PA', 'PB', 'PC', 'RA', 'RB', 'RC', and 'EC'.
- 'Format' with a dropdown menu set to 'CSV'.
- 'Generate Extract' and 'Submit to Batch' buttons.

The right column, titled 'Select Calendars', contains:

- Radio buttons for 'active year' (selected), 'list by school', and 'list by year'.
- A list box showing a selection of school years: '23-24', '23-24 Arthur Elementary', '23-24 Carter Middle', '23-24 Cleveland Elementary', '23-24 Fillmore Middle School', '23-24 Harrison High', '23-24 Lincoln Elementary', '23-24 Taylor K-8', '23-24 Van Buren High School', and 'KG 23-24 Cleveland Elementary'.
- A note at the bottom: 'CTRL-click or SHIFT-click to select multiple'.

At the bottom of the interface, there's a 'Refresh' button, a 'Show top' dropdown set to '50', and a date range filter: 'tasks submitted between 03/28/2024 and 04/04/2024'. Below this is a 'Batch Queue List' table with columns: 'Queued Time', 'Report Title', 'Status', and 'Download'.

Report Logic

- This report will generate a record population for students with Early Education Data on Enrollment, that do not have an Early Education State Program.
 - If a Student has a Grade Level of PA, PB, PC, RA, RB, RC or EC and does not have an Early Education State Program with dates that overlap the Active School Year.
 - If student has more than one enrollment, report population should report a row for each valid enrollment.
- The report can be run against a district's active year as well as any prior year.
- The report can be run in District Editions.
- The report will be generated in CSV format as well as a human-readable format (HTML).

Generating the Extract

1. Enter an **Effective Date**.

2. Choose a student **Ad Hoc Filter** to limit report results to applicable students in that filter.
3. Select **Grades** to include.
4. Select report **Format**.
5. Selected the **calendar(s)** that should be included in the extract.
6. Click the **Generate Extract** button to generate the report in the indicated format or **Submit to Batch** to schedule when the report will generate.

Users have the option of submitting an Early Education Export to the batch queue by clicking **Submit to Batch** instead of Generate Extract. This process will allow larger reports to generate in the background, without disrupting the use of Campus. For more information about submitting a report to the batch queue, see the [Batch Queue](#) article.

Report Layout

This report will generate all valid student information based on EE Enrollment data to allow the district to review and then create Early Education State Programs for the students using the State/Federal Program Updater. District staff will need to review the extract prior to submitting to the SFPU for duplicate data based on multiple enrollments, Attendance and Membership data, and IEP Status. Students who have an overlapping enrollment with and end date will generate on this extract with both start date and end date.

Element	Description & Format	Campus Location
Student State ID	The student's state identification number. <i>Numeric, 13 digits</i>	Index> Student Information> Demographics identity.stateID
Last Name	The student's last name. <i>Alphanumeric, 40 characters</i>	Index> Student Information> Demographics Identity.lastName
First Name	The student's first name. <i>Alphanumeric, 40 characters</i>	Index> Student Information> Demographics Identity.firstName

Element	Description & Format	Campus Location						
Start Date	<p>The start date of the Enrollment.</p> <ol style="list-style-type: none">1. The enrollment must overlap current Active Year.2. The enrollment must have one of the Grade Levels in DE70. <p><i>Alphanumeric</i></p>	<p>Student Information> General> Enrollments> Start Date</p> <p>enrollment.startDate</p>						
End Date	<p>The end date of the Enrollment.</p> <ol style="list-style-type: none">1. The enrollment must overlap current Active Year.2.
