

Course Catalog

Last Modified on 12/14/2025 8:45 pm CST

Tool Search: Course Catalogs

A Course Catalog is a high-level organization of all course masters in a specific school. A high school might have a different course master for each grade level. Those course masters make up the catalog. Fields marked with a checkbox on this editor cannot be changed on the course and MUST be managed through the Course Master.

Review the [Course Masters Overview](#) article for information on Course Masters best practices and a Course Master Workflow.

Course Catalogs

Choose the items that should be locked for a course. Changes will be pushed from the linked Course Master to Courses in selected calendars. Items that are locked cannot be modified on the Course, with the exception of those items marked with the information tool tip. Changes to these items will be pushed to courses but can also be modified on the Course editor screen.

Select All/None

Course Catalogs

Administrators can lock certain settings when creating a course catalog. This reduces differences across the district and provides a more uniform approach to curriculum.

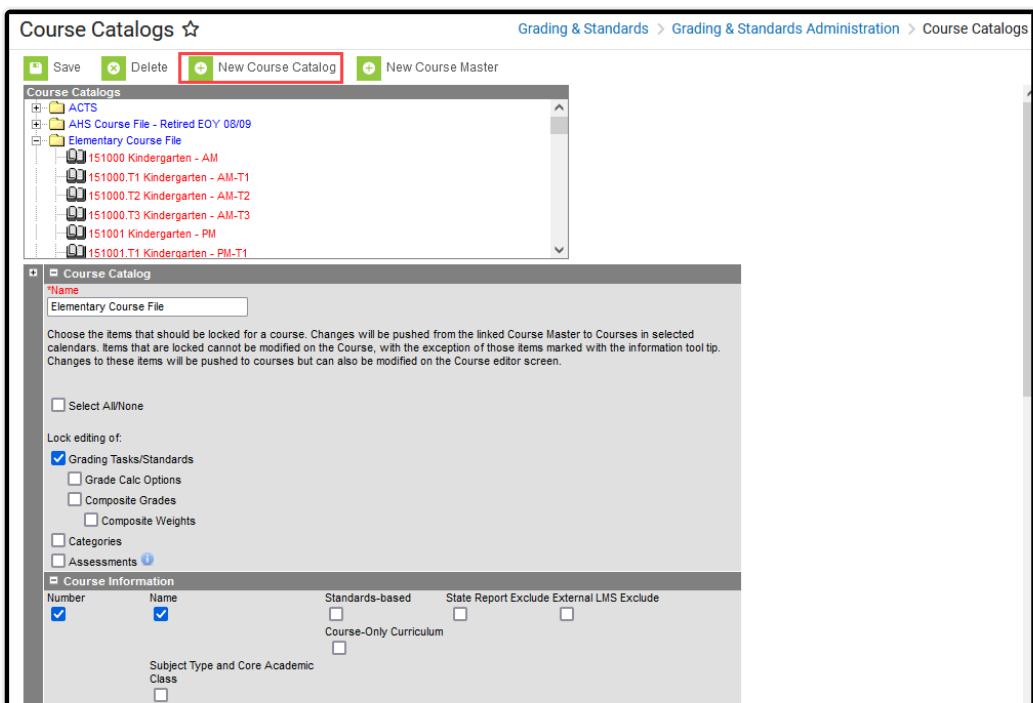

When a field is locked on the Course Catalog, it is immediately locked for all courses linked to a Course Master in that Course Catalog, but Course Master data is NOT pushed to that field until the individual Course Master is saved.

See the [Course Catalog Tool Rights](#) article for information on rights needed to use this tool.

Create a New Course Catalog

1. Select the **New** icon.
2. Enter the **Name** of the Course Catalog. Note that Course Catalogs must have unique names.
3. Mark the **Select All/None** checkbox to mark ALL checkboxes on the Course Information, NCES Data and Description editors as locked. Or, leave unmarked to choose which fields are locked.
4. Click the **Save** icon. The new catalog appears in the Course Catalog tree.

It is highly recommended that districts use different course numbers in different course catalogs. For example, a high school course catalog should have different course numbers than those used in the middle school.

The screenshot shows the 'Course Catalogs' screen with the following details:

- Header:** Course Catalogs, Grading & Standards > Grading & Standards Administration > Course Catalogs.
- Toolbar:** Save, Delete, New Course Catalog (highlighted with a red box), New Course Master.
- Course Catalogs Tree:**
 - ACTS
 - AHS Course File - Retired EOY 08/09
 - Elementary Course File
 - 151000 Kindergarten - AM
 - 151000.T1 Kindergarten - AM-T1
 - 151000.T2 Kindergarten - AM-T2
 - 151000.T3 Kindergarten - AM-T3
 - 151001 Kindergarten - PM
 - 151001.T1 Kindergarten - PM-T1
- New Course Catalog Form:**
 - Name:** Elementary Course File
 - Locking Options:** A note states: "Choose the items that should be locked for a course. Changes will be pushed from the linked Course Master to Courses in selected calendars. Items that are locked cannot be modified on the Course, with the exception of those items marked with the information tool tip. Changes to these items will be pushed to courses but can also be modified on the Course editor screen." Below this is a checkbox for "Select All/None".
 - Lock editing of:**
 - Grading Tasks/Standards
 - Grade Calc Options
 - Composite Grades
 - Composite Weights
 - Categories
 - Assessments
 - Course Information:**

Number	Name	Standards-based	State Report	Exclude	External LMS	Exclude

Course-Only Curriculum						
<input type="checkbox"/>						
Subject Type and Core Academic Class						
<input type="checkbox"/>						

New Course Catalog

Lock Fields on a Course Catalog

Any field that displays on the Course editor can be locked to limit edits made by other users. When locked on the Course Catalog, attributes for Grading Tasks and Standards remain editable on both the Course Master and Course. However, deletion of existing data on the Course (assigned grading tasks, assessments, etc.) is NOT possible, even when the user has the correct tool rights.

When an item is marked to be locked, changes made to the Course Master are pushed to the courses in the selected calendars. The locked items cannot be modified on the Course except for the following. Behavior for locking these fields is noted below:

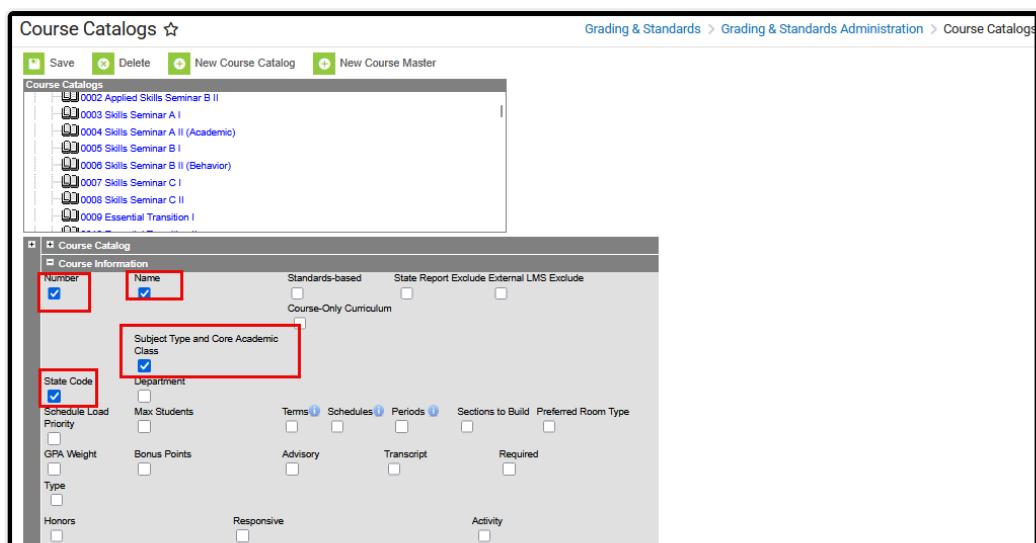

- Assessments - when locked, information copies forward and is pushed, but changes can be made to assessments at the course level.
- Terms - when locked, information from the Course Master is pushed to courses, but changes can be made at the course level.
- Schedules - when locked, information from the Course Master is pushed to courses, but changes can be made at the course level.
- Period - when locked, information from the Course Master is pushed to courses, but changes can be made at the course level.

Lock Fields

1. Select which catalog to set lock properties.
2. Mark the **Select All/None** checkbox to lock ALL fields. You can also mark each field individually (see step 5).
3. If editing of grading tasks and grading standards needs to be limited, mark the **(Lock editing of) Grading Tasks/Standards** checkbox.
4. If editing of categories needs to be limited, mark the **(Lock editing of) Categories** checkbox.
5. If editing assessments needs to be limited, mark the **(Lock editing of) Assessments** checkbox.
6. If editing grade calculation options needs to be limited, mark the **(Lock editing of) Grade Calc Options** checkbox.
7. **Composite Grades** can be locked separately from the rest of Grade Calc Options.
8. If not all of the listed fields need to be locked, mark the fields that need to be locked through each available editor.
9. Click the **Save** icon when finished. The changes are saved.

Locked data displays in gray text on the Course editor, and changes can only be made through the Course Master. There is also a note on the Course editor that indicates it is linked to a Course Master.

In this example, the **Number**, **Name**, **State Code**, and **Subject Type/Core Academic Class** fields are marked as locked on the Course Catalog Editor.

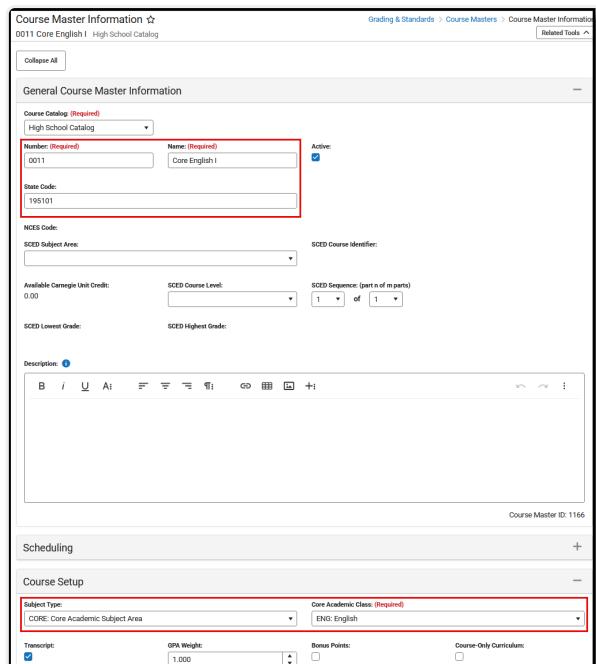

The screenshot shows the 'Course Catalogs' page with a list of courses on the left and a detailed view of a selected course on the right. The course details are as follows:

Course Information - Fields Locked for Editing Cannot be Modified

Locked Fields on Course Information and Section Information

Some Section Information fields that share a name with Course Information fields - same options, same functionality, etc. The Section fields act as an OVERRIDE to the values selected at the Course level.

When pushing data from the Course Master to Course, and from Course to Section, the values populated at the Section level are NOT updated to match the data at the Course level, nor are they locked from editing at the Section level.

In the following example, the **Instruction Method** field on the Course Master is set to AN: Applied Instruction. That Course Master was pushed to the Course, and the same value is assigned and cannot be modified on the Course Information editor.

District Defined

Section Information Override Value Selection

When future updates are made to the Course Master and pushed to the Course and then to the Section, the values selected in the Override fields are NOT UPDATED.

Course information is the core reporting information **unless** the Section is populated. This means:

- Values populated in the Section Information fields take precedence over the values populated in the Course Information fields.
- Section Information fields appear blank unless they are populated manually.
- Section Information fields should only be populated when the values need to differ from the Course Information fields.

Create a New Course Master from the Course Catalog

Course Masters can be created from the Course Catalog view. However, adding Grading Tasks, Standards, and Assessments must be done in the [Course Masters](#) toolset.

1. Select the **New** icon.
2. Select the **Course Catalog** to which this new course master belongs.
3. Enter the **Number** of the Course Master.
4. Enter values for the remaining fields on the editor.
5. Click the **Save** icon when finished.

Information can be saved at any time. Users can enter values for one editor at a time and save after each one or enter all values at once and save at the very end.

See the [Course Masters](#) article for detailed information on adding data to course masters.

Add a Course Catalog to a School

Tool Search: School Information

This is Step 2 in the Course Master Workflow.

After creating the Course Catalog, the [School](#) editor must be updated to recognize that the school uses one.

1. Navigate to **School Information** and select the applicable school.
2. Select the **Course Catalog** from the dropdown list.
3. Click the **Save School** icon.

School Information ★

School & District Settings > Schools > School Information

School data is divided into two areas: School Detail and School History. School History records contain information related to a school that can be tracked historically. By creating a new School History, the new information is tracked as of a specific date while the previous values are preserved. To create a new School History record, select an existing School History and click the New School History button. This will create a new School History record based on the current information, which can be modified as needed and saved.
