The Student Record Maintenance Extract is the end-of-summer snapshot of all summer graduates through August 31. It also includes records of any exit status changes for students who are part of the most recent four-year cohort. These records must be submitted through the student maintenance collection. This is the final disposition used for determining the status of the most recent cohort and will be the final opportunity to submit graduate record information. This extract replaces the fall Single Record Student Database collection.

Student Maintenance Record Extract Editor

Report Logic

The following describes the report logic:

- All summer graduates (through August 31) or any exit status changes for students who are part of the most recent four-year cohort must be submitted through the Student Record Maintenance Extract.
- One unique record is reported per student. The most recent enrollment record is used to determine and report data.
- If a student is dually enrolled, the enrollment record with a Service Type = P is used. If all enrollment records have a Service Type = P, the most recent enrollment record is used.
- For a course to report, a SCED Course Identifier must be selected, and the Migrant Education checkbox must be marked on the student's MSDS tab.
- For an incident to report for a student, it must have a State Event Code and a State Resolution Code mapped to the [Event Types](#) and [Resolution Types](#).
- When the Section 25 field is marked in the extract editor, only students who report in the Section 25 component will be included in the extract. Data will only be reported from the first occurring enrollment with Section 25 selected in the current year.

Generating the Report

1. Select the Student Record Maintenance **Extract Type**.
2. Enter the **Count Date** in *mmddyyyy* format or by clicking the calendar icon and selecting a date. If no Previous Count Date is entered, a snapshot of data will be taken as it exists on this date.
3. Enter the **Previous Count Date** in *mmddyyyy* format or by clicking the calendar icon and selecting a date. This date correlates with the Count Date entered. Student data will report within the date range entered in these two fields.
4. If desired, check the **Students w/o UICs** checkbox. If checked, only students who do not have a State ID assigned will report.
5. Select the **Submitting Entity**. This describes the entity submitting the extract to the state.
6. Mark the **Section 25** checkbox to report the student's First Day of Instruction.
7. Unmark the **Include Special Education** checkbox to exclude the InitailIEP, SpecialEducation, and ECSpecialEdAssessmentType components in the extract.
8. Mark the **Include Early On** checkbox to include the EarlyOn, InitialIFSP, PartBReferral, PartCAssessment, and EarlyOnServices components in the extract.
9. Select the **Format**. For submission to the state, use the State Format (XML).
10. Select an **Ad hoc Filter** to limit the records reported. When an Ad hoc Filter is selected, the report is based on the options selected in the editor, not the Campus toolbar.
11. If desired, check the **Validate** checkbox. This checkbox means Infinite Campus will run a check on the XML data to validate that it is correct. If errors are found, the extract will list them for correction based on the schema.

For guidance in validating the XML file against your state's schema using a free, third-party program, see the [Validating an XML File Against a Schema File](#) article.

12. Indicate if the extract should **Include Protected Identity Info**.
13. Select which **Calendar(s)** to include within the extract.
14. Click **Generate Extract** to generate the report in the indicated format or **Submit to Batch** to schedule when the report will generate.

Users can submit a report request to the batch queue by clicking **Submit to Batch** instead of Generate Extract. This process allows larger reports to be generated in the background without disrupting the use of Campus. For more information about submitting a report to the batch queue, see the [Batch Queue](#) article.

Extract Layout

If the **Include Protected Identity Info** checkbox is marked in the extract editor, Demographics fields report from Census > People > Identities > Active Identity > Protected Identity Information.

Other Consequence Type	The State Resolution Code of any additional resolutions. <i>Alphanumeric, 5 characters</i>	Student Information > General Information > Behavior Resolution BehaviorResolution.code
Other Days	The number of days any additional resolutions lasted. Only reports one decimal place, no rounding. <i>Decimal, 5 characters, XX.XX</i>	Student Information > General Information > Behavior Resolution BehaviorResolution.Duration
Follow Up	Indicates measures done to follow-up after the incident and/or educational services provided to the student. If more than one action/ service occurred report the primary education service or referral first. Additional codes may be reported as needed, but only distinct codes will report, not duplicates. <i>Alphanumeric, 2 characters</i>	Student Information > General Information > Behavior Resolution BehaviorResolution.service
Attendance	This component reports if the student has an End Date within the extract Date Range and not 19 or null, or if the extract Reporting Window is EOY.	
Days Attended	The number of days the student actually attended. This field does not address instructional days or clock hours. For the EOY count day, reports based on the last day of school, not including summer school. For services that are not school-based (e.g., services provided in the home), reports how many days out of the days available that the student received services. The data populating this field for the end-of-year collection or at the student's exit from the district is a cumulative count of the student's attendance for the entire academic school year, as of the last day of attendance.
