Tool Search: Household Members

If Campus Human Resources is enabled, Household information is maintained in the Personnel Master. See the following article for more information:

[Campus SIS Integration with Campus HR](#)

The **Household Members** tool lists all persons who have ever lived in the selected household. Due to legacy issues, it is recommended that members be not deleted from the household but rather ended. Information on a particular member can be viewed by selecting that member from the **Household Member Editor** table.

The fields vary by state. Please see your state's [State Tools](#) articles for more information on household member procedures in your state.

Household Members

Household memberships are displayed on a student's Summary tab. If a household member is a student, the student's enrollment information is also listed (school of enrollment and grade level). The image below shows Primary household memberships; if a student were a member of a secondary household, that information would also display, as would non-household memberships.
