Tool Search: Electronic Release Setup

Districts can establish connections for the electronic release of student transcripts through an eTranscript vendor if their vendor of choice uses an electronic release API. The district's system administrator must request this information from your eTranscript vendor. Infinite Campus does not provide this information to districts.

Establishing a vendor configuration is Step 4 in the [eTranscript Workflow](#).

See the [System Preference Tool Rights](#) article for tool rights information.

Electronic Release Setup ☆

System Settings > System Preferences > Electronic Release Setup

Name *	int-api		
Auth Server *	http://int-api.vendor.com	Auth Path *	/send-library-api/v1/oauth/token
Upload Server *	http://int-api.vendor.com	Upload Port *	80
Consumer Key *	3235ffff69-5858-60bb-5858-b-700-w8a8bc6c2323	Consumer Secret *	*****
User Name *	user_name@vendor.com	Password *	*****

Electronic Vendor Setup

Electronic Release Field Descriptions

Field	Description
Name	Indicates the name of the vendor (Parchment, NCS, etc.).
Auth Server	Displays the root server address for oauth authentication.
Auth Path	Indicates the authentication endpoint relative to the authserver.
Upload Server	Indicates the root server address for transcript submission.

Field	Description
Upload Port	Lists the port used for transcript submission.
Upload Path	Indicates the release server (port) endpoint used to submit transcript information.
Consumer Key	Lists the client key for authentication of eTranscript authorization.
Consumer Secret	Lists the code provided to the district for eTranscript authorization access.
User Name	Login credentials for accessing the eTranscript vendor information. This field can be up to 100 characters.
Password	Login credentials for accessing the eTranscript vendor information.

Enter Electronic Release Information

1. Click the **New** button at the bottom of the page. A clear editor screen displays.
2. Enter the values into the correct fields. This information should be obtained from your vendor of choice. Infinite Campus does not have access to this information.
3. Click the **Save** icon when finished. The entered data is saved in the editor.

Test Electronic Release Configuration

Once the information to access the vendor's API is entered, a connection to the server needs to be tested.

1. Select the saved configuration information by clicking on the editor.
2. At the bottom of the page, click the **Test** button. A blue **Test Initiated** pop-up will display to the right, indicating that a test has been initiated.
3. When that test completes, either a green **Your connection is valid** pop-up displays or a red **Connection failed** pop-up displays.

Once the connection is valid (green pop-up), you can generate an [eTranscript Batch Report](#) using the Batch Queue function and release eTranscripts electronically.

Connection Pop-ups

When the test is successful, click the Close button. Multiple vendor configurations can be entered if desired. Click the **New** button to add additional configuration details. Configuration details can be deleted when necessary. Select the configuration to delete and click the delete button at the bottom of the page.

Delete Vendor Configuration
