

Continuous Serve (Process Patron Transactions)

Last Modified on 07/15/2024 1:49 pm CDT

Point of Sale 1.0 has been deprecated as of 7/1/2023. Please see the [Cashier Cheat Sheet](#).

Continuous Serve is used when all patrons are purchasing the same menu item. The meal only needs to be selected once; i.e., before serving the first patron.

The screenshot displays the 'Continuous Serve' interface for processing patron transactions. At the top, a 'Lunch' tab is selected. The main menu area is divided into several colored boxes representing different food items: 'Duty Free Lunch' (yellow), 'Juice' (orange), '2nd Entree' (light blue), 'Adult Lunch' (yellow), 'Water' (cyan), 'Salad Bar' (green), 'Extra Milk' (white), and '9-12 Lunch' (dark grey). On the left side, there is a transaction summary section with fields for 'Student #', 'Balance: \$0.00', 'Current TX: \$0.00', and 'Total: \$0.00'. Below this is an 'Options' button. At the bottom left, there is a table with columns for '#', 'Item Desc', and 'Price', and an 'Input' field. In the center, a large white box contains the instruction: 'Select purchasable item(s) to serve then select done.' To the right of this box is a large green 'DONE' button.

1. Choose the item(s) ALL patrons are purchasing then select **Done**.

Student #:
Balance: \$0.00
Current TX: \$0.00
Total: \$0.00

Options

#	Item Desc	Price

Input

Ready to Serve Patrons

Search Menu

Selected for purchase

- Patrons enter their PINs as they go through the line. The cashier does not need to select purchasable items each time.

Cashier's can search for patrons, allow patrons to enter their PINs or scan patron bar codes to select the patron for processing.

- At the end of the serving period, log out of the Continuous Serve application by selecting the **Options** button, clicking **Logout** and clicking **OK** to close the Continuous Serve application.
