Report Logic

A record reports for each Primary student enrollment in the calendar and grade selected where the End Date is null or on or after the Effective Date. If no Primary enrollment meets the above criteria, a record reports for the most recent enrollment with a Service Type of "S: Partial" if the Start Date is on or before and the End Date is on or after the Effective Date.

Generating the Extract

1. Select the **Extract Type**, Iowa Testing Barcode.

2. Enter an **Effective Date** in *mmddyyyy* format or by clicking the calendar icon and selecting a date. This field defaults to the current date.
3. If cross-site enrollment functionality is enabled at the district level, the **Exclude Cross-Site Data** checkbox will display (defaults to checked). Deselect if you want cross-site data included in the report.to display.
4. Select an **Ad hoc Filter** to limit the students in the report to those included in the filter.
5. Select the appropriate checkboxes to indicate which **Grades** should be included in the report.
6. Select the **Format** in which the report should be generated. CSV, XML, and HTML formats can be used for data review and verification, whereas State Format should be used when submitting data to the state.
7. Indicate which **Calendar(s)** should be included in the report. All calendars selected should be in the same school year.
8. Click **Generate Extract** to generate the report in the designated format.
