

# CELDT Pre-ID Extract

Last Modified on 06/21/2024 2:59 pm CDT

[Report Logic](#) | [Extract Editor Details](#) | [Generate the Report](#) | [Data Elements for the CELDT Extract](#)

Tool Search: CELDT Pre-ID Extract

The CELDT (California English Language Development Test) extract is generated to request Pre-ID labels for students who are English Language Learners. The reporting group is any K-12 student in the requested calendar(s) who is enrolled on the effective date (and who has a start date after the "enrolled after" date if that is chosen).

*CELDT Pre-ID Extract*

Because the CELDT Pre-ID extract reports previous test scores, these tests must be set up correctly in the Assessment Test editor prior to generating these extracts. See the [Assessment Setup for CELDT](#) page for more information.

Students marked as Student Exclude on their enrollment record, or enrolled in a Grade Level marked State Exclude, or in a school marked as State Exclude are not reported.

## Report Logic

This extract reports any student in grades KN-12 in the selected calendar(s) who is enrolled on the Effective Date (and who has a start date after the Enrolled After date if that is selected) and who has a Program Status of Pending and an Identified Date or Enrollment Start Date on or before the Effective Date.

Only students with an EL record in pending status who have not previously taken the CELDT are

included.

Students marked as State Exclude, in a grade level marked as State Exclude, or in a school marked as State Exclude do not report. When more than one identity exists, the report only includes the current identity of the student.

Tests with a State Code of 105 and Subject Codes of the following are included:

- 158: Listening
- 177: Overall Comprehension
- 187: Reading
- 231: Speaking
- 491: Writing

## Extract Editor Details

The following describes each field of the dates section.

Field	Description
<b>Effective Date</b>	The extract includes students with active enrollment as of this date. Dates can be entered in <i>mmddyy</i> format or selected by clicking the calendar icon.
<b>Only Report Students Enrolled After</b>	Only students who enrolled within the selected calendar(s) on or after this date are included in the extract. Dates can be entered in <i>mmddyy</i> format or clicking the calendar icon and selecting a date. This is NOT a required field.
<b>Ad hoc Filter</b>	Filters reported data based on preexisting Ad hoc filters.
<b>Format</b>	The format of the generated extract. When submitting to the state, use the State Format (Fixed Width).
<b>Testing Date</b>	This field indicates the date the test is administered. Dates can be entered in <i>mmddyy</i> format or clicking the calendar icon and selecting a date.
<b>Legal Name and Gender</b>	When marked, a student's legal name and legal gender information report (entered in the <a href="#">Protected Identity Information</a> section on the Identites tool), instead of the name and gender entered in the Person Information section.  When this checkbox is marked and the student does not have legal name and gender information populated, the student's name report from the name and gender fields.
<b>Delivery Homeroom</b>	When selected, the teacher's name and course section number for the student's homeroom course is reported on the extract.

Field	Description
<b>Delivery Period</b>	When selected, the teacher name and course section number for the student's course in that period report. If the student is not enrolled in a course during this period on the Testing Day, the field reports a blank value. Options for periods are limited to only those period names in the active year.
<b>Grades</b>	Designates which grades have information pulled on the extract.
<b>Calendar Selection</b>	Users must select at least one calendar in order to generate a Pre-ID Extract. Multiple calendars can be selected by using the CTRL and SHIFT keys.  Users are advised to limit the number of calendars selected as it impacts overall system performance.
<b>Report Generation</b>	Use the <b>Generate Report</b> button to display the results of the report immediately. Use the <b>Submit to Batch</b> button to choose when the report should generate.

## Generate the Report

There are two Delivery fields on this editor - **Delivery Homeroom** and **Delivery Period**. Neither of these fields are required for the report generation; however, if choosing to select one, only choose one or the other. For example, if the Delivery Homeroom selection **is made**, the Delivery Period selection **would not be made**.

1. Enter the **Effective Date** in *mmdyy* format or by clicking the calendar icon and selecting a date.
2. Enter the **Only Report Students Enrolled After** (if applicable) in *mmdyy* format or by clicking the calendar icon and selecting a date.
3. Select an **Ad hoc Filter**, if applicable.
4. Select a **Format**. When submitting the extract to the test vendor, use the State Format (Fixed Width).
5. Enter a Testing Date.
6. If a student's legal name and gender should report, leave the **Legal Name and Gender** checkbox marked. Otherwise, remove the checkmark.
7. Mark the **Delivery Homeroom** checkbox, if desired. Marking this checkbox includes the teacher's name and course number of the student's homeroom course on the extract.
8. Select a value from the **Delivery Period** list, if desired. Choosing a value in this field includes the teacher name and course section number for the student's course in that period on the extract.
9. **Select a** value from the **Grades** list if desired.
10. Select which **Calendar(s)** to report on the extract.
11. Click the **Generate Extract** button. The extract displays in a separate window in the designated format.
