#### Tool Search: MOSIS Extracts

The ACT Pre-code File reports a record for all 11th grade students who are actively enrolled in the selected calendar(s) as of the entered Effective Date.

#### **Report Logic**

One record per 11th grade student reports. If the student has more than one primary enrollment with the same FTE and the same enrollment type in different schools, the latest school enrollment reports. The enrollment with the highest Percent Enrolled (out of 100) reports as of the effective date of report generation.

- If there are multiple enrollments with an equal percent enrolled value, the P: Primary enrollment reports.
  - If there is no primary enrollment, the S: Partial enrollment reports.
  - If there is no partial enrollment, the N:Special Ed Services enrollment reports.
- If there are multiple enrollments with the same date after the above logic, the enrollment with the highest enrollment ID reports.

Enrollments are included when the enrollment start date is before or equal to the entered Effective Date and enrollment end date is after or equal to the entered effective date.

Students in 11th grade are NOT included in this extract if:

- The enrollment record is marked as No Show or State Exclude.
- The grade level is marked as State Exclude.

• The calendar of enrollment is marked as State Exclude.

## **Report Editor**

The following fields are available for the Pre-Code File Extract. Some options may not appear until the Pre-Code File Extract Type is selected.

Field	Description
Extract Type	Indicates the type of MOSIS Extract being generated. Choose <b>Pre-code File</b> .
Report Protected Identities	When marked, student identity information (last name, first name, etc.) reports from the Protected Identity Information fields.
Report State Excluded Students	When marked, students who meet the report population requirements but their enrollment record is marked as State Exclude report along with all other records. When not marked, students marked as State Exclude on their enrollment record are excluded from the report.
Effective Date	Entered date is used to return students actively enrolled as of that date.
Ad hoc Filter	Selection of a filter limits the set of students to only those included in the filter.
Assessment Type	Determines the pre-code file that generates. Choose <b>ACT: ACT</b> .
Format	Determines the program used to display the report. State Format is in CSV - use this option when submitting data to the state. Use the other options or data review and testing - Tab Delimited, HTML, or XML.
Calendar Selection	Indicates from which enrollments are included in the extract. At least one calendar must be selected to generate the report. Calendars can be selected by active year, school name or year.
Report Generation	The report can be generated immediately using the <b>Generate Extract</b> button. When there is a larger amount of data chosen (several calendars, large date range, etc.), use the <b>Submit to Batch</b> button, which allows the user to choose when the report is generated. See the <u>Batch Queue</u> article for more information.

#### **Generate the ACT: ACT Assessment Pre-Code Extract**

1. Select the **Pre-code File** option from the **Extract Type** dropdown list.

- 2. Enter the **Effective Date** in *mmddyy* format or by clicking the calendar icon and selecting a date, if applicable.
- 3. Mark the **Report Protected Identities** checkbox, if desired.
- 4. Mark the **Report State Excluded Students** checkbox, if desired.
- 5. Select an **Ad hoc Filter**, if applicable.
- 6. Select the **Assessment Type** as **ACT: ACT** from the dropdown list.
- 7. Select the desired **Grade Levels** to include in the extract.
- 8. Select the desired **Format** of the extract. For submission to MOSIS, select the State Format (CSV). Select any of the other formats for data review prior to submission.
- 9. Select which **Calendar(s)** to include report within the extract. Selecting multiple calendars may impact extract generation times and overall Campus performance.
- 10. Click the **Generate Extract** button or the **Submit to Batch** button. The extract will appear in a separate window in the designated format.
