[Database Views](#) | [Adding Views to be Flattened](#) | [Views Not Available for Flattening](#) | [Removing Views from Flattening](#)

Tool Search: Data Options

This tool is only available to districts/states that have data warehousing functionality enabled.

The Data Options tool allows a system administrator the ability to manually add/remove specific database views from being "flattened" by the data warehouse optimization process.

Data Options ☆

System Settings > Data Warehouse > Data Options

Save

Views moved to the right will be 'flattened' during the data warehouse refresh process. Reports that run against a flattened view generate much faster, but the process of flattening a view is database intensive, increases the time it takes to generate the warehouse, and increases the size of the warehouse. It is recommended that users only include views that are used frequently. Views that appear gray are not available for flattening but are, along with the remaining unselected views, still accessible in the warehouse.

Database Views	Views to Flatten
<ul style="list-style-type: none"> CCS_calendarUnits CCS_Counselor CCS_disability1 CCS_disability2 CCS_DV_CustomStudentSummary CCS_specialEdSetting CCS_specialEdStatus CCS_SpecialEdStudentData CCS_TranscriptWithCurrentCourses CCS_view_class LessonPlanActivity v_AccountManagement v_Address v_AdHoc_mnHispanicSubcategories v_AdHoc_mnRaceSubcategories v_AdHoc_waHispanicSubcategories v_AdHoc_waRaceSubcategories v_AdHocADA v_AdHocADAHist v_AdHocEarlyWarningScore v_APCheckPayment v_APVendor v_ARCustomer v_ARCustomerCreditAvailable 	<ul style="list-style-type: none"> activeTrial attendanceCode calendarStructure cube_attendance cube_behavior cube_enrollment cube_grades cube_roster cube_sped cube_student cube_transcript individual ISEP_3_4_5 ISEP_3_4_5_development ISEP_3_4_5_Instructional ISEP_ADM_Instructional ISEP_Allotment ISEP_Basic ISEP_Instructional_final ISEP_Res_Final ISEP_residential2 ISEP_SchoolAdj ISEP_SchoolECR_IRG ISEP_Totals sectionStaff

Data Options Tool

Database Views

All views existing in the live database (including Campus views and custom district views) are displayed in the **Database Views**. These views are auto-detected by the data warehouse process.

for Flattening section for more information.

2. Click the **Add** button. The selected views will appear in the Views to Flatten box.
3. Click **Save** to save the changes.

The added views will be flattened/optimized by the data warehouse the next time a backup is generated.

Views Not Available for Flattening

Several complex views cannot be flattened by the data warehouse optimization process. These views appear in gray-colored font in the Database Views box. The following views are not available for flattening:

- v_AttDailyDetail
- v_AttDailyExactDetail
- v_AttDailyTermCount
- v_AttendanceCourseCount
- v_AttendanceSectionCount
- v_AttendanceSectionTermSummary
- v_GradebookActivityDetail
- v_SectionRosterAttSummary

Views excluded from the flattening process can still be selected from the data warehouse backup, but reporting off of these views will likely be system-intensive.

Removing Views from Flattening

Removing unnecessary views from the flattening process may shorten the generation time of the data warehouse backup.

Views may be removed from the optimization process at any time by removing them from the **Views to Flatten** box. The views that are currently flattened before inclusion in the data warehouse are shown in the **Views to Flatten** box. Views that are not flattened before inclusion in the data warehouse are listed in the **Database Views** box.

Save

Views moved to the right will be 'flattened' during the data warehouse refresh process. Reports that run against a flattened view generate much faster, but the process of flattening a view is database intensive, increases the time it takes to generate the warehouse, and increases the size of the warehouse. It is recommended that users only include views that are used frequently. Views that appear gray are not available for flattening but are, along with the remaining unselected views, still accessible in the warehouse.

Selected views will be removed from the Views to Flatten box and returned to the Database Views box after clicking the Remove button

Remove

Removing Views from Flattening Process

To remove views from the data warehouse optimization process:

1. Select the views to be removed from the flattening process from the Views to Flatten box.

To select multiple views hold the CTRL or SHIFT keys while clicking on views.

2. Click the **Remove** button. The selected views will be moved to the Database Views box.
3. Click **Save** to save the changes.

The removed views will not be flattened/optimized by the data warehouse the next time a backup is generated.
