This report extracts data for the HS Government and HS MISA PreID extract. The High School Assessments (HSA) are end-of-course tests in Science and Government. All local educational agencies (LEA) submit Pretest and Correction Files. The Pretest File identifies all students who qualify to take the HS Government and HS MISA in a particular content area, qualify for the administration, and are in the identified Test format (paper or electronic). The Pretest File is used to register students for online or paper testing and to create the preprint file that is used to create student labels for test answer sheets delivered to each school.
