Tool Search: Ed-Fi

This entity represents any program designed to work in conjunction with, or as a supplement to, the main academic program. Programs may provide instruction, training, services or benefits through federal, state or local agencies. Programs may also include organized extracurricular activities for students.

Object Triggering Logic

This table describes logic for triggering syncing of this object.

Action	Trigger
Post	When Flag is created and is mapped to an Ed-FI Program Type Descriptor and a resync is completed • The Program record will Post when the first student is given an eligible Flag record that is mapped. • All students will reference the same programs once the first one is created.
Post	Post a Program when a student is assigned to a program record in the following areas. The record must overlap the configured year and have a Student School Association record to report. • Career Tech Program • Title I • SPED - locked IEP • Homeless • EL • Migrant • FRAM Eligibility
Delete	If a mapping is removed from Resource Preferences. Programs will only be deleted when a mapping is removed after a resync is completed and 'All Schools' is checked on resync. Programs are at the district level and students in another school may have a Student Program Association record that references the Program. All Student Program Association records must be deleted before a Program can be deleted.

School Exclude, Calendar Exclude, Resource Toggle and Resync Logic

This table describes the School Exclude, Calendar Exclude, Resource Toggle and Resync logic of this object.

Action	Trigger
None	If a resource is toggled to 'OFF' after data has sent, all sent data will remain in the ODS but no new data will send.
Resync	If a record is in the Ed-Fi Identity Mapping table and not in the ODS, it will be deleted from the Ed-Fi Identity Mapping table.
Resync	If a record is in the ODS and it does not have a matching record in Campus or the Ed-Fi Identity Mapping table, it will be deleted from the ODS.
Resync	If a mapping is changed in Resource Preferences, a resync will need to be done to reflect the changes.

Natural Key Changes, Cascading Updates, and Deletes Logic

This table describes the Natural Key Changes/Cascading Updates and Deletes logic of this object.

Action	Trigger
Post/Delete	Natural Key change: • LEA Reference - District Numbers cannot change after data has been sent. If a district number changes, we would expect an Ed-Fi error and this change would not be supported. • If the Program Name or Program Type Descriptor mapping changes.

Action	Trigger
Delete	Cascading Deletes: If the Natural Key changes, the following resources will be deleted/reposted. • Student Program Associations, Student Homeless Program Associations, Student Migrant Program Associations, Student Title 1 Part A Program Associations, Student Neglected or Delinquent Program Associations, Student Language Instruction Program Associations, Student CTE Program Associations, Student Special Education Program Associations, Student Food Service Eligibility Associations. • If a mapping to the Ed-Fi Program Type Descriptor is removed or changed, a resync must be completed on 'All Schools' to delete/repost Student Program Associations. If only 1 school is selected, only Student Program Association records associated with that school will be updated and the Program will remain until a resync on 'All Schools' for Programs is completed.

Scope Year Logic

This table describes scope year logic of this object.

Logic
The record will send to the scope year for the school year the program record is associated with.
Data will only send for the years that have valid configuration.

Error Log

Error	Possible Causes/How to Fix
409: Failed to delete programs resource. [message:The resource (or a subordinate entity of the resource) cannot be deleted because it is a dependency of the 'generalStudentProgramAssociation' entity.]	There are dependent resources in the Ed-Fi ODS so the Program record cannot be deleted. Use the delete tool to remove any dependent data before the course can be removed.
