The Unique ID Batch File is used to submit student and staff records for assignment of IDs and to submit enrollments and withdrawals from the district.

Report Logic

Student File

No Unique ID

- The file reports all students with an active enrollment as of the date of extract who DO NOT have an ID in the Unique State ID field (Census > People > Demographics > Unique State ID) including students of all enrollment types (P, S, and N).
- Each student will only report from one enrollment even if they have multiple active enrollments at the time of the extract.

All Active Students

- The file reports all students with an active enrollment as of the date of the extract including students of all enrollments types (P, S, and N).
- Each student will only report from one enrollment even if they have multiple active enrollments at the time of the extract.
- This version of the extract is used for student data updating at the state level utilizing the same system as the Unique ID.
- Student's marked as State Exclude do not report.

Staff File

- Staff members only report if they have an active District Assignment on the extract date and do not have a Unique ID currently in Campus.
- Only reports from the staff member's first district assignment. Each person only reports one line in the extract.

• Enrollment Event

- The report includes all student enrollment entries and withdrawals from the Start Date through the End Date entered on the extract editor.
- Any time a user changes the value in the Start Date, End Date, or Withdrawal Date field on the student's Enrollment, Campus creates a record in the Enrollment Date Event table in the Campus database. This record includes an Edit Date. If the record's Edit Date is on or between the Extract Editor dates, a record reports.

All Reports

 A trailer record reports and includes the Record Type of TT, the Transmission ID entered in the extract editor, and the Number of Records reported.
