Campus Learning Usage

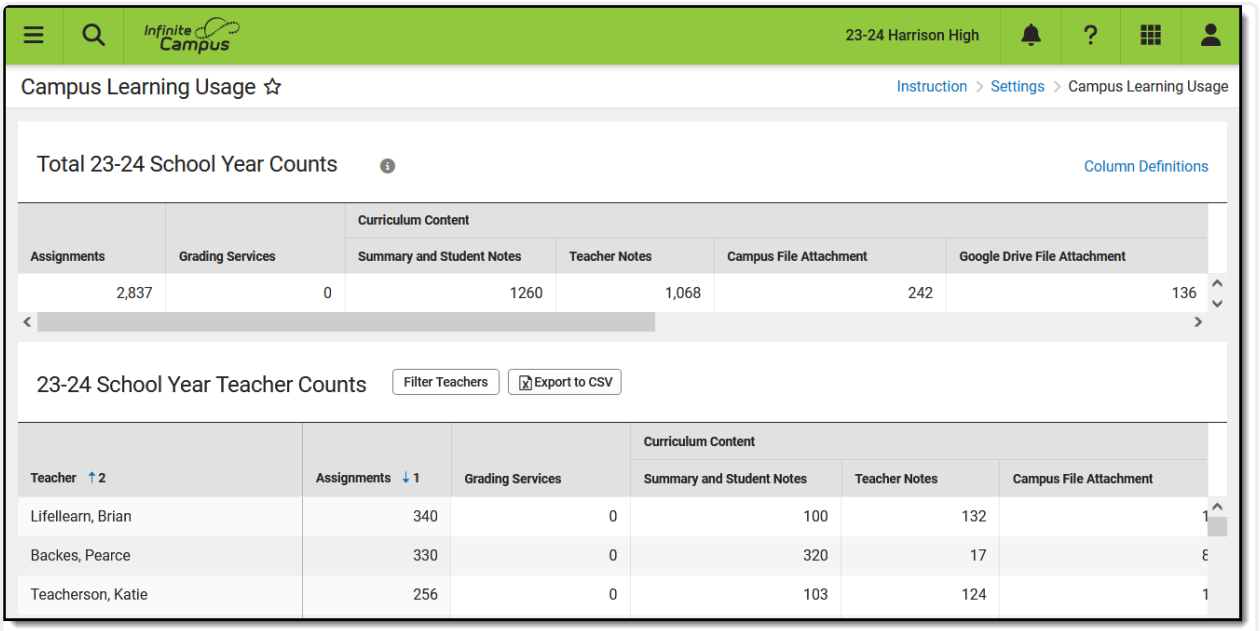

Last Modified on 10/28/2026 4:37 pm CDT

This tool is available with Campus Learning Suite.

Tool Search: Campus Learning Usage

The Campus Learning Usage tool tracks how staff are using tools in the Campus Learning offerings. Filter results by selecting a School and Calendar in the Campus Toolbar or view usage for the entire district.

Totals for the School or District are shown in the top table, with totals for individual teachers in the second table.

The Campus Learning Usage tool provides totals for school staff using Campus Learning features.

See the Instruction Settings Tool Rights article for more information.

Column Definitions

Counts are provided for the following features, which are also described in the Column Definitions link:

Feature	Description
Assignments	A base count of all assignments.
Folders	A base count of all folders.
Grading Services	Assignments received from an 3rd party learning management system (LMS) through a Digital Learning Partner connection to the OneRoster API.
Curriculum Content	Files attached to assignments.
Summary and Student Notes	Assignments/resources that have content in the Summary and Notes fields, which are visible in student and parent views.
Teacher Notes	Assignments/resources that have content in the Teacher Notes field, which is visible only to teachers when looking at the assignment.
Campus File Attachment	Assignments/resources with a file attached that is stored in the Campus Digital Repository (CDR). This field counts both files attached in For Students to be accessible in student views and those attached in For Teachers, which are only visible in the assignment.
Google Drive File Attachment	Assignments/resources with a google drive file attached. This field counts both files attached in For Students to be accessible in student views and those attached in For Teachers, which are only visible in the assignment.
Discussions	Assignments/resources that include a Discussion
Student Submission	Enabled options allowing students to submit responses.
File Attachment	Assignments/resources set up to accept student responses via files stored in the CDR.
Text Editor	Assignments/resources set up to receive student responses via a text editor.
Google Drive	Assignments/resources set up to receive student responses via google drive files.
Quiz	Assignments/resources that include a Quiz.
Communication	
Section Feeds	The number of sections with activity in the Section Feed.
Engagement Check-in	The number of engagement check-ins.
Ask a Question	The number of times the Student Questions functionality.

Data Analysis Options

The Teacher Counts table can be sorted numerically by any of the feature columns.

Click **Filter Teachers** to add a search field to the top of the list.

Click **Export to CSV** to export the table as currently displayed as a CSV file, to be viewed using a program such as Excel.
