Health vaccines and their associated compliance listings are based on state guidelines. While Infinite Campus maintains standard guidelines for all states, districts have the ability to enter additional compliances. The following information describes vaccine compliance rules as defined by the Kentucky Department for Public Health.

For more information on the creation, modification or deletion of vaccine compliances, see the [Vaccines](#) page.

## General Compliance

- Vaccine doses given up to 4 days before the minimum recommended age or interval remain valid.
- A 4-day grace period may be used to shorten the minimum interval between doses of the same vaccine, but must not be applied to the 4-week interval required between two different live vaccines. When each live vaccine had been administered alone at both time points, however, the grace period may be applied to the second dose.

### Time Interval Conversions

- One month is equal to 28 days.
- One year is equal to the person's birth date minus 4 days.
- Six months is equal to 28 days x 6 - 4 (168 - 4 = 164 days).
