Custom Programs (Student Information)

Last Modified on 08/20/2026 1:54 pm CDT

Path: System Data > Custom Data and Links > Custom Tool Setup

Custom Programs can be set up and added to the Campus menu so the school or district can track program information that is not provided by Infinite Campus. These custom editors are set up in System Administration.

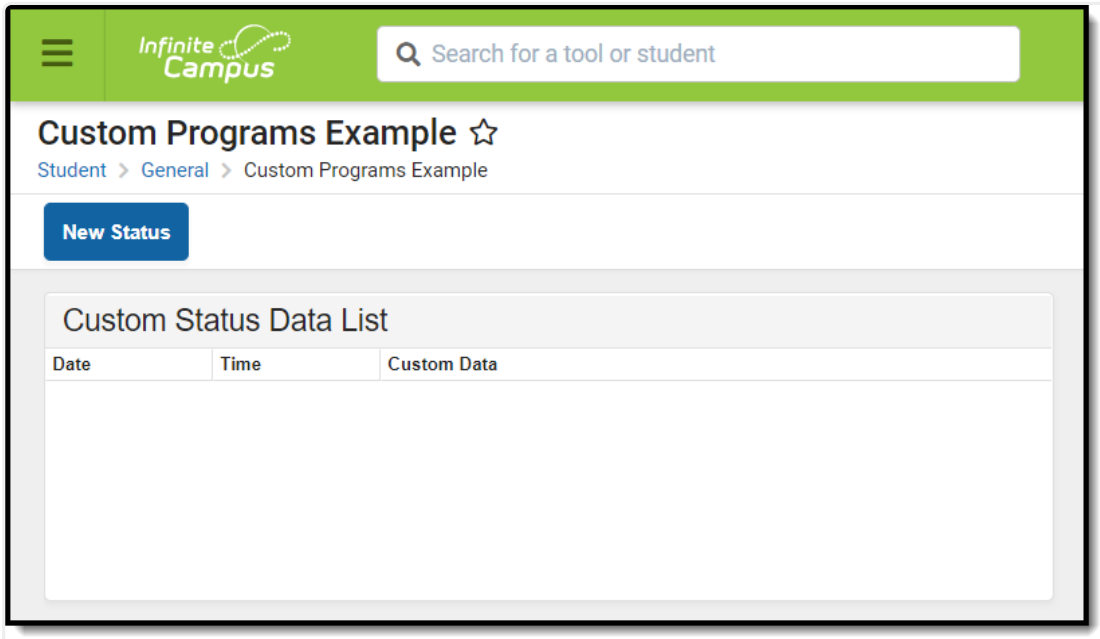

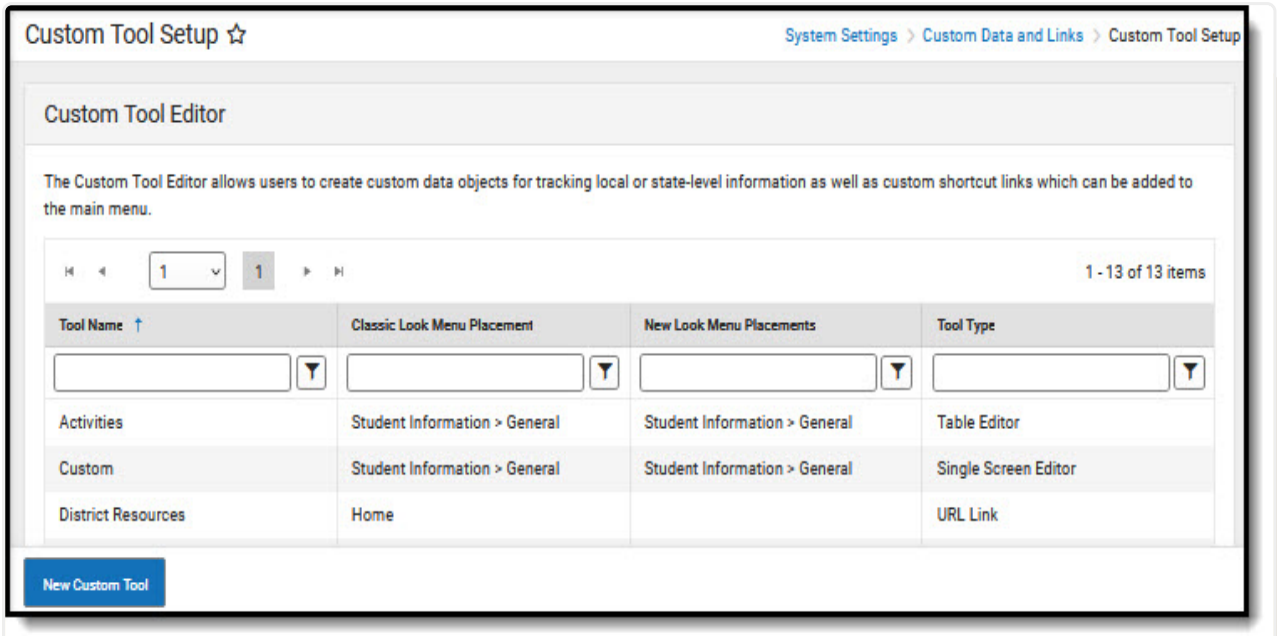

Image 1: Program Participation - Custom Programs

In order for a custom editor to display in the Program Participation area, it must be assigned to display in the **Custom Programs** Person toolset. Follow the instructions provided for creating a Custom Tool. Modify existing custom tabs or create new custom tabs that will display in the Program Participation area.

Custom Tool Setup - Custom Tool Editor

If moving an existing custom tab from one Person toolset to another Person toolset, you may need to log out after making the change and log back in before the tool will appear in the new location.

When there are no custom programs, a message will display to indicate none exist.
