Tool Search: Transcripts

A transcript is a historical record of a student's performance in a course. The information listed on the transcript can vary from district to district, depending on district preferences. Each district records grade information that students receive on transcripts and report cards. Grade information is connected to a student's course schedule.

Student Transcript

See the [Transcripts Tool Rights](#) article for information about rights needed to use this tool.

Transcript Information in Ad hoc Query Wizard

Transcript information is available in the Query Wizard for Student data types in the **Student > Learner Portfolio > Transcript Detail** folder.

Navigation and Features

The home screen of the Transcript tool is a read-only view of the student's transcript records. It is typically organized by the school year, with the most current school year first. This view displays basic course information - the year the course was taken and in which school, grade level, course number and name, whether the course was repeated, the score received, GPA-related fields (Weighted, Unweighted, Weight), credit information (Earned, Attempted, Credit Type), length of the course (Actual Term, Terms Long), and a Comments field.

All transcript records for all school years and calendars are listed here. Click anywhere on the transcript record to modify additional details for the selected record. Alternatively, use the Edit button to add or modify a record quickly. Clicking anywhere on a transcript record opens the Detail view of just that record; using the Edit button allows for the quick editing of the entire transcript. Only the two most recent groups of transcript records are listed in Edit mode. Mark the **Show All Records** button to display every transcript record for the student.

► [Click here to expand...](#)

Feature

Get a quick view of the student's transcript by school year (automatic sort option). See the [Column Grouping](#) section for more information. Sorting happens within each grouping.

When records are grouped, they can be sorted by clicking the dragged value in the header to ascend or descend. The records within those groups are sorted by clicking the table headers.

In the first image to the right, the Course Number column is sorted ascending (A-Z), and includes an up arrow indicating the sort has been altered. In the second image, the Course Number column is sorted descending (Z-A), and includes a down arrow.

Group the column headings using click-and-drag technology. This re-sorts the transcript entries into a sort by the selected groupings.

The default sort option is Year. This is the school year in which the student took that course, and the score received was posted on the transcript. All transcript records are displayed in year order, with the most recent year first. You can remove this (click the X next to Year) or click and drag additional columns into the header.

The graphic to the right shows the Course Name added to the header. Now, the transcript records are sorted by Year and then by Course Name.

Each time a new column heading is added to the header, transcript data is sorted accordingly. Column headings can be moved to sort by, for example, Course Name and then by Year.

See the [Column Grouping](#) section for additional information.

Collapse the group on the left side to display only the records for the desired year.

The image to the right shows transcript data for the 2017-18 school year and the other school years are collapsed.

8050	Spanish Immersion 9 I	No	A	3.57		1	1

Feature

Click Edit to modify existing records quickly. Once opened, you can change current records and add new ones (by clicking **Add Rows**).

Use the Add Rows option like the **Batch Add** option on the original Transcript. An Add Rows pop-up displays where the number of rows can be entered. The number of Rows, School Year, School Name (may also be Transfer School Name), and Grade level are required.

When you are finished, click Save to save the changes and return to the Main screen. Click **Cancel** to return to the Main screen.

The Free Form Entry sub-right applies to the Course Number, Course Name, School Number, and School Name fields. When assigned, any value can be entered into these four fields.

Once in **Edit** mode, only the two most recent groups of transcript records display. These groups can be records from the last two school years or the same school year but from different calendars.

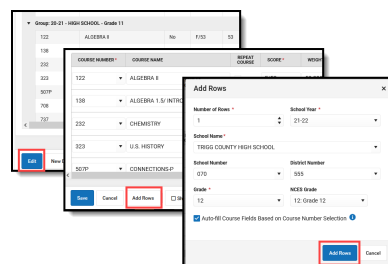

When there are more records to show, a note of **Additional Records is hidden** at the end of the two groups. Mark **Show All Records** to display more transcript entries.

When all records are displayed, a note of **End of Records** displays.

Use the **New Details** button to add a new record. When finished adding, click the arrow next to the **Save** button and choose **Save** to save the record and return to the Main screen or **Save & New** to save the record and add another.

Add transcript-related documents using the **Documents** option. See the [Documents](#) section for more information.

Image

Feature	Image
<p>Print the student's transcript from the Main screen by clicking the Reports button. See the Reports section for more information.</p>	
<p>On the Detail screen, transcript information is organized into <i>cards</i> - School Information, Course Information, Scoring Information, Transcript Credit Information, and Additional Information.</p> <p>Localized fields and district-defined fields are displayed on the Additional Information card, which is collapsible.</p>	
<p>When viewing the details of an existing record, navigate to the next record by clicking the name of the next course record in the lower right-hand corner, or view the previous transcript record by clicking the name of the previous course record.</p>	
<p>Inactive courses are displayed in the field dropdown lists with an INACTIVE label in both the Main and Detail screens.</p> <p>When printing the Transcript, the INACTIVE label does NOT print.</p>	

Feature

Scores are organized into Score Groups and Rubrics. When GPA Values and/or GPA Unweighted Values are added to the Score Group, those values are displayed in parentheses behind the score name.

Score groups and rubrics associated with the selected course for the record are displayed first in the dropdown list.

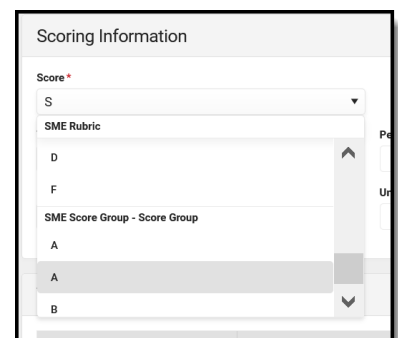

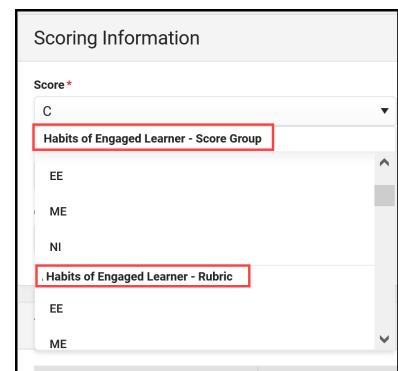

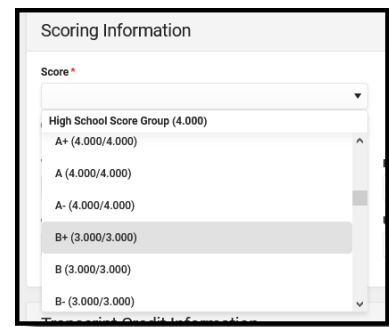

Identical Score Group/Rubrics

When identically named Score Groups and Rubrics exist, the type of group is appended to the end of the group name. For example, a Score Group named Habits of Engaged Learner and a Rubric named Habits of Engaged Learner would be listed in the score dropdown as *Habits of Engaged Learner—Score Group* and *Habits of Engaged Learner—Rubric* (see the second image for an example).

When identically named Score Groups or Rubrics have the same name and scores, only one entry is listed for the group, and the scores display as duplicates (see the third image for an example).

When there are two identical Score Groups and an identically named Rubric, one entry is listed for the Rubric, and one entry is listed for the duplicate Score Groups; the scores of the Score Group are duplicated (see the fourth image for an example).

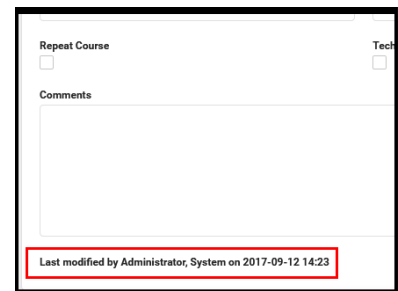

Image

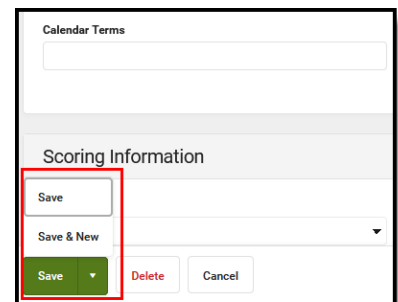

Feature

Modified By information displays at the end of the transcript record as part of the Additional Information card. It indicates the last user to change the transcript and when (date and time). This does not display for transferred records or converted district data.

Image

Add a new detail record by manually populating the cards with the appropriate information. When ready to save, click the **Save** icon or click the down arrow next to the Save icon to save the entry or save the entry and add a new entry (**Save & New**).

Use the **Auto-fill Course Fields Based on Course Number Selection** preference to automatically populate other course-related fields. This is available when adding a new Detail record, adding new Rows, and editing existing records. By removing the checkbox, it can be turned off (other course fields will not auto-fill).

These fields are auto-filled:

- State Code
- Terms Long
- GPA Weight
- Credits Attempted
- Credit Type
- Credit Overflow Override
- SCED Subject Area
- SCED Course Identifier
- Online Learning

Feature

When adding a new record, enter part of a course name or number (at least one character - symbols, letters, or numbers). Matching results display in the dropdown list for easy selection.

Course Names and Numbers are populated from the following:

- **Course/Section from the school where the student was previously enrolled (School Number on the Transcript record).**
- **Course/Section from the school selected in the Campus toolbar where the student is currently enrolled.**
- **Course Master used at the district.**

The list of courses returned also depends on the school year selected for the Transcript record. If no school year is selected, the school year selected in the Campus toolbar is used.

When selecting a course number, appropriate fields, including SCED and Online Learning fields, are auto-populated when adding a new record from either the Detail or the Main screen. GPA Weight, Credits Attempted, Credit Type, Terms Long, and Credit Overflow Override are also updated as Course Numbers are entered. Editing an existing record does not change those values automatically.

The Free Form Entry sub-right applies to the Course Number, Course Name, School Number, and School Name fields. When assigned, any value can be entered into these four fields.

An **Original Value** label is displayed next to the original values populated for the Course Number and Course Name (see the second image to the right). Re-selecting the original value does not populate the additional fields from the Course.

Error messages display when a field exceeds the maximum character limit, noting the correct field length. Records cannot be saved until the correct field length is entered.

Image

Things to Know

Grade Levels

- A grade level must exist within the calendar for it to be associated with a transcript record.
- When a grade level is marked as Exclude from GPA, courses taken by a student in that grade level may still display on the transcript (depending on other course setup scenarios). This only indicates that scores received for courses taken in that grade level are NOT factored into GPA calculations.

Refer to [Grade Level Setup](#) for additional information.

Course Name and Course Number

If the exact same course name and number are available in multiple course catalogs, all instances of that course name/course number populate the dropdown lists. Users can select which calendar/course catalog is appropriate for the Transcript record.

Course Name and Number values return as follows:

- When a new entry is added for a course taken at the same school selected in the Campus toolbar, the Course Name and/or Course Number values populate from the available courses at that school. Once a course name/course number is selected, the score field displays the score group associated with that course at the top of the list of all score groups/rubrics.
- When a new entry is added for a course not taken at the school selected in the Campus toolbar, the Course Name and Course Number values populate from the school where the student was previously enrolled. This occurs when the previous school is in the same district.
- The Course Master (Course Catalog) used at the district is also used to return applicable courses.

When adding or modifying a transcript record, the name of the Course Catalog displays after the course name or number.

Scoring Information

Course Number with Course Catalog Name

Transcript records are sorted by Course Number in ascending alphanumeric order, starting with 0, 1, 2, 3, A, B, C, then by Course Name in alphanumeric order, then by Actual Term number, numeric ascending (12 is after 2), then by the transcript ID. For example:

- 000123 - Algebra
- 0001234 - Algebra
- 000200
- 02
- 123 - Algebra
- ALG123 - 123Algebra
- ALG123 - Algebra

Credit Type

Credit types are sorted in the following order.

1. Credit Groups and Standards associated with the selected School name on the Transcript Record sort first. These are selected on the [School Standards](#) tool.
2. Credit Groups and Standards not associated with the selected School name follow and include a label of NOT IN USE.

When entering transcript records by typing in the School field (not selecting options from a dropdown list), Credit Groups and Standards display as if a School is selected on the Transcript record.

Column Grouping

Transcript entries are grouped by Year, School Name, and Grade Level. Each column can be re-sorted by clicking on the column header. In addition to those options, the transcript can be grouped by clicking and dragging the column headers into the very top row to suit your preferences.

Click the column header you wish to add to the group option and drag it to the group row. The transcript re-sorts by the headers listed. Refreshing the browser returns the grouping to the default option of records grouped by Year, School Name, and Grade Level.

Click and Drag Grouping

When grouped, records can be sorted by clicking the dragged value in the header to ascend or

descend. The records within those groups are sorted by clicking the table headers.

Edit an Existing Transcript Record

When editing a Course Name or Course Number, enter at least one character to return a list of matching values.

Two options exist for editing existing records:

- Locate the record in the list of transcript items, click on it to open the Detail Screen, and modify the information (option 1); OR
- Click the **Edit** button, which changes each row of the existing records into editable fields (option 2).

Option 1

Hover over the row that needs to be modified. Click anywhere in that row to view or edit the record. This opens that record in the Detail Screen, where updates can be made to any of the available fields.

- Click the **Save** button when finished; or
- Click the arrow next to the Save button to **Save & New**, where changes are made to the record and a new Details screen displays for the addition of another transcript record; or
- Use **Save & Next**, where changes are made to the record, and the next record in the transcript is displayed for editing.

Click Transcript Record to Edit the Details

Option 2

Click the **Edit** button. This changes the read-only view of the transcript record to an editable format. Update the fields as needed; use the tab keys to move through the fields and rows.

Click **Save** when finished.

The screenshot shows the Infinite Campus Transcript interface. On the left, a list of courses for 'Group: 19-20 - High School - Grade 11' is displayed. A red arrow points from the 'Edit' button in the bottom left of this list to the 'Edit' button in the bottom left of the '19-20 - High School - Grade 11' transcript details window. The transcript details window shows a table with columns: COURSE NUMBER, COURSE NAME, REPEAT COURSE, and SCORE. The table contains several rows of course data, including English 11 I, AP World History I, Modern Chemistry, AP Calculus 1 & 2 (Block), Adv Span Lit & Culture 11 I, English 11 II, AP World History II, and Modern Chemistry II. At the bottom of the transcript details window, there are buttons for 'Save', 'Cancel', 'Add Rows', 'Documents', and 'Reports'.

Choose **Edit** to modify all rows of the Transcript

From this view, additional rows can be added for a quick [batch add](#) of transcript data. See the section below for more information.

Add New Rows to the Transcript Record

When in **Edit** mode, where every existing row is editable, an option exists to add rows to the transcript. This can be used to add several transcript records at once, which is useful when entering basic transcript information for a new transfer student.

1. From the Main screen, click the **Edit** button, then click the **Add Rows** button. An Add Rows pop-up will display, where you can enter the number of rows needed.
2. In the pop-up, select the **school year**, **school name**, and **grade** level in addition to the number of rows. The School Year and School Name are prepopulated with the school selected in the Campus toolbar, and the Grade Level is prepopulated with the student's current grade level or enrollment.
3. Click the **Add Rows** button. The empty rows are displayed at the top of the Transcript record for the selected school year, school, and grade level.
4. Enter the appropriate information for the new transcript records. Use the tab keys to move through the rows.
5. Click **Save** when finished. The new transcript records are saved.

Repeat these steps as needed. There is no limit to the number of rows that can be added.

Note the following when modifying information in the **Add Rows** pop-up:

- When changing the School Name, if the **School Number** or **District Number** has not yet been changed, those fields are automatically updated to the associated values related to the newly changed **School Name**.
- When changing the **Grade Level**, if the **NCES Grade Level** has not yet been changed, that field is automatically updated to the associated value related to the newly changed Grade Level.
- Each time the **Add Rows** button is selected, the values in the pop-up default to the last information used to add rows. This makes adding several records at one time (Batch Add) faster.
- When canceling the **Add Rows** pop-up and then selecting **Add Rows** again, the values in the **Add Rows** fields return to the associated values related to the calendar selected in the Campus toolbar.

Add as many rows as needed. Only those that are populated are saved. Any rows that do not have the fields populated are removed when saving the record. Any new records with an existing group (School Year, School Name, Grade Level) are merged with others in that group upon saving.

Add Rows

A new row or a new record cannot be saved until all required fields are populated. Field popups display when data is missing from the required fields.

Delete Transcript Record

Detail Screen Card Descriptions

Expand the items below to see descriptions of the fields available on the transcript.

School Information Fields

School Information fields provide information on where the student was enrolled when the selected course was taken.

School Information Fields

► [Click here to expand...](#)

Field	Description	Auto-Fill Behavior	Ad hoc Field Name
School Year	Identifies the year the student received the score for the selected courses. School years sort in descending school year order (i.e, 2017-18, 2016-17, etc.).	This field auto-fills on the current year value.	transcriptDetail.startYear, transcriptDetail.endYear Returns the start and end year in which the student took the course in YYYY format.
School Name / Transfer School Name	Identifies the name of the school where the student took the course. This state-designated name populates from the selected school/calendar when the score is posted to the transcript. School names are sorted in alphabetical order. The Free Form Entry sub-right applies to this field. When assigned, any value can be entered here. See the School Name Attribute section below for more information.	This field auto-fills on the School Number value.	transcriptDetail.schoolName
School Number	Identifies the state-assigned school number where the student took the course. This populates from the selected school/calendar when the score is posted to the transcript. School numbers are sorted in numeric (ascending) order. The Free Form Entry sub-right applies to this field. When assigned, any value can be entered here.	This field auto-fills on the School Name value.	transcriptDetail.schoolNumber

Field	Description	Auto-Fill Behavior	Ad hoc Field Name
District Number	Identifies the district where the student took the course. When the score is posted to the transcript, this field populates from the selected school/calendar.	This field auto-fills on the School Name value.	dist.number
Grade	Indicates the grade level of enrollment when the student received the score for the course. Grade levels are sorted by the sequence assigned to the grade level.	This field auto-fills on the student's current grade level value.	transcriptDetail.grade
NCES Grade	<p>Indicates the NCES (National Center for Education Statistics) grade level when the score was received.</p> <p>The NCES Grade Level mapping is set using the Grade Level Definitions tool. NCES grades are sorted by the sequence assigned to the grade level.</p> <p>This field is required to send transcripts using the eTranscript tool.</p>	N/A	enrollmentHistory.ncesGrade

School Name Attribute

When necessary, users can modify options for certain transcript fields in the Core Attribute/Dictionary. The district maintains dictionary values entered in the Attribute/Dictionary. Note that when users are assigned the Free Form Entry sub-right, any value can be entered for the School Name (as well as School Number, Course Name, and Course Number).

Transcript Course Attributes

The Data Type selection determines the School Name attribute's behavior.

When TranscriptCourse.schoolName has a Data Type of **textfield**, the School Name and School Number lists on the Transcript Editor populate from the list on the Schools editor. A Data Type of textfield is the default option.

When TranscriptCourse.schoolName has a Data Type of **drop-down list**, the School Name and School Number lists on the Transcript Editor populate with the Name (School Name) and Code (School Number) from the associated dictionary (first image) of the attribute plus the School Name and Number on the [School](#) editor (second image).

School Name Dictionary Items

New School

School data is divided into two areas: School Detail and School History. School History records contain information related to a school that can be tracked historically. By creating a new School History, the new information is tracked as of a specific date while the previous values are preserved. To create a new School History record, select an existing School History and click the New School History button. This will create a new School History record based on the current information, which can be modified as needed and saved.

Course Information Fields

Note the following information about the **Auto-fill Course Fields Based on Course Number Selection** Preference:

- When the preference is NOT marked to auto-fill, when the course number is selected, and the course name field is empty or has not been modified, the course name still auto-fills from the selected course number.
- This preference is stored locally for each user. If the user removes the checkbox for the preference (auto-fill does not occur) and clears the browser cache, the preference defaults back to being marked the next time the user adds Transcript records.
- When the user removes the checkbox from the Add Rows modal, the preference is also not marked when adding a new Details record, and vice versa.
- The Course Number selection always respects the preference's current status. When it is marked and new rows are added, then remove the checkbox and add two more rows, the auto-fill does not occur.

Field	Description	Auto-Fill Behavior	Ad hoc Field Names
Score	<p>Displays the score the student received for the transcript entry. This field also displays the GPA Value and the Unweighted Value in the dropdown list.</p> <p>When a course is selected, the score group assigned to the course appears first in the list of all score groups/rubrics.</p> <p>If a course number does not match the school's list of course numbers (e.g., a transferred course), all score groups used by the district are listed.</p> <div>When a score is changed, ALL of the GPA fields update.</div>	<p>This field auto-fills GPA Value, GPA Max, Unweighted GPA.</p>	<p>transcriptDetail.score</p> <p>Returns either the letter grade or the numeric value, depending on the score group assigned to the course.</p>

Field	Description	Auto-Fill Behavior	Ad hoc Field Names
Weighted GPA Value	<p>Displays the GPA value of this score based on the grading scale for the district or school. This is used for Weighted GPA calculations and Unweighted GPA calculations when the transcript record does not have an Unweighted GPA Value.</p> <p>This field accepts up to four decimal points (XXX.XXXX).</p>	This field auto-fills on the Score value.	transcriptDetail.gpaValue
Percent	<p>Indicates the percentage value represented by the score received on this entry.</p> <p>This field accepts up to four decimal points (XXX.XXX).</p>	N/A	transcriptDetail.percent
GPA Max	<p>Identifies the maximum GPA value achievable for this course and score.</p> <p>This field accepts up to four decimal points (XXX.XXXX).</p>	This field auto-fills on the Score value.	transcriptDetail.gpaMax

Field	Description	Auto-Fill Behavior	Ad hoc Field Names
GPA Weight	<p>Identifies the GPA weighting for this entry up to four decimal places.</p> <p>If the GPA Weight on a Transcript Course Record is blank/null, the GPA Value for that Course is not included in any Weighted or Unweighted GPA calculations on the transcript.</p> <p>This field accepts up to four decimal points (XX.XXXX).</p>	This field auto-fills on the Course Number value.	transcriptDetail.gpaWeight
Unweighted GPA Value	<p>Indicates the Unweighted GPA value of this score based on the grading scale for the district or school. This is used for Unweighted GPA calculations.</p> <p>This field accepts up to four decimal points (XXX.XXXX).</p>	This field auto-fills on the Score value.	transcriptDetail.unweightedGPAValue

Transcript Credit Information Fields

Transcript Credit Information displays the number of credits the student earned and attempted for the course record and to which credit category (type) it applies. Note that values for Credits Attempted, Credit Type, and Credit Rollup Overflow auto-fill on the populated Course Number Information.

When adding a new transcript record, a blank row of credit-related fields displays. This allows users to add the appropriate credit values without adding a row first.

Additional Information Fields

► [Click here to expand...](#)

Field	Description	Auto-Fill Behavior	Ad hoc Field Name
Transcript ID	A unique identifier for the transcript entry. The ID is used in state reports and allows users to easily identify which transcript record relates to the record on the report.	N/A	transcriptDetail.transcriptID
Bonus Points	GPA bonus points associated with this entry. This field accepts values less than 100 and up to four decimal points (XX.XXXXX).	N/A	transcriptDetail.bonusPoints
Status	Status of course, such as R (required) or E (elective), etc.	N/A	transcriptDetail.status

Field	Description	Auto-Fill Behavior	Ad hoc Field Name
Task Code	<p>The code associated with the transcript entry.</p> <p>This field should be populated with either the Grading Task Code (entered on the Grading Task Detail) or the Standard Number Code (entered on the Standard Detail editor)</p>	N/A	N/A
Standard Number	State- or district-defined number for this standard. This field populates with the Standard Number (entered on the Standard Detail editor).	This field auto-fills on the Standard Name value.	transcriptDetail.standardNumber
Standard Name	State- or district-defined standard name for this course.	This field auto-fills on the Standard Number value.	transcriptDetail.standardName
Repeat Course	Indicates the student has previously taken this course.	N/A	<p>transcriptDetail.repeatCourse</p> <p>Returns a value of 0 if the checkbox is not marked, or a value of 1 if the checkbox is marked.</p>
Technology	Indicates whether the transcript entry meets technology reporting requirements.	N/A	<p>transcriptDetail.technology</p> <p>Returns a value of 0 if the checkbox is not marked, or a value of 1 if the checkbox is marked.</p>

Field	Description	Auto-Fill Behavior	Ad hoc Field Name
Comments	<p>Lists any general notes on the transcript entry.</p> <p>This field is also displayed on the Main Detail view.</p> <p>The entire comment displays in the pop-up text when the user hovers over this field on the Main screen.</p>	N/A	transcriptDetail.comments

Documents

Upload previous student transcript reports from other schools of enrollment for a particular student. This uses the [Digital Repository](#) features. There is no limit to the number of documents uploaded here, but be aware that your district may have set a maximum file size value.

Only documents uploaded from the Transcript tool are displayed here. To view other types of uploaded documents, use the [Person Documents](#) tool.

Mark the **Consent** statement (files cannot be saved if this is not marked), and click the **Select File** button to locate and upload documents. File names must be unique. Click the **Save** button when finished. A successful upload displays a Done checkmark next to the Select Files button. Close the side panel by clicking the **Cancel** button.

The screenshot displays the 'Transcripts Document Upload' interface. The main area contains a table with columns: Course Number, Course Name, Repeat Course, Score, Weighted, Unweighted, Weight, Earned, Attempted, and Credit Type. The table lists various courses for Group 19-20 - Robbinsdale Armstrong High School - Grade 11. On the right, a 'Document List' side panel is open, showing a list of uploaded files. The first file is '2020 Metrics.xlsx' with a date of 12/04/2020. A red X icon is next to the file name, indicating it can be removed. At the bottom of the side panel are 'Upload' and 'Cancel' buttons. A red arrow points from the 'Documents' tab in the main interface to the 'Document List' side panel.

Transcripts Document Upload

Uploaded files can be sorted by Newest (most recently uploaded) or Oldest. Click the red X next to the file name to remove an uploaded document.

For more information on document upload, see the [Managing Document Attachments](#) article.

Reports

Click the Reports button on the main screen to print the student's transcript. This opens a side panel with all available Transcript Reports. The Default Report contains the standard transcript elements and can be printed without creating a transcript report in [Report Preferences](#). Other reports listed here have been created in Report Preferences.

Choosing any report from the side panel opens in a new browser window. Reports are in PDF format.

Control whether the Default Transcript Report displays as a print option by setting the **Enable Default Transcript** [System Preferences](#).

The screenshot displays the 'Reports' section of the Infinite Campus interface. On the left, a list of courses is shown for a student in Group 1234 S. The 'Reports' dropdown menu is open, showing options like 'Default', 'Insufficient Credits Transcript', 'Official Transcript No ACT Scores', and 'Transcript by Term'. A 'Print Transcript Record' button is visible at the bottom of the interface.

Total Credits: 14.000

Courses Taken 2018-2019 Grade 10 from High School

Courses Taken 2019-2020 Grade 11 from High School

All transcript courses are displayed on the printed transcript regardless of how a student is scored and what transcript preference options were selected for credits and standards. This selection affects the credit/standard groups displayed in the Credit Summary and Standards Summary.

Note that In-Progress grades and planned courses are not counted in the Credit Summary.

A transcript is printed for each of the student's households with a guardian where the Mailing checkbox is marked. Only one transcript prints if all of the student's guardians are in the same household. If guardians are in more than one household, the number of households in which the guardians reside determines how many transcripts are printed.
