Dates

Report data from the 2021-22 school year. The data reported should be as of October 1 (or the closest school day to October 1), unless otherwise noted. This is known as a "Fall snapshot." LEAs should use the same Fall snapshot date to report data in this module.

The count of students with disabilities (IDEA) may be based either on the Fall snapshot date or on the district's IDEA child count date.

Data about credit recovery programs and credit recovery program participation should be cumulative based on the start of the 2021-22 school year up to one day prior to the start of the following school year.

When to Report Zero (0) and When to Use Blanks (i.e. Null Values)

Zeroes represent an actual count or number for fields that are applicable to a given school or LEA. Report a zero ("0") only if the LEA has collected the information and the amount to report for that field is zero. Do not report a "0" for data not collected. Leave a field blank if the LEA does not collect data for that field, if the amount asked is unknown, or if the question does not apply to the LEA.

Not Applicable (NA) and Zero (0) Autofills in Tables

The online tool remembers information that has been entered in other tables and modules and uses that information to fill related tables with either a Not Applicable (NA) code or zero (0) where appropriate. For example, if it is reported that a school does not have any female students who are EL, then other tables that ask Nopefor counts of female students who are EL will be automatically filled with a zero.

Key Definitions

- **Advanced Placement (AP)** refers to a program, sponsored by the College Board, through which students may earn college credit and advanced college placement by successfully completing AP courses and standardized AP exams.
- **Credit recovery programs** (including courses or other instruction) aim to help more students graduate by giving students who have fallen behind the chance to "recover" credits through a multitude of different strategies, including online. Different programs allow students to work on their credit recovery classes over the summer, on school breaks, after school, on weekends, at home on their own, at night in school computer labs, or even during the school day.
- **Dual enrollment/dual credit programs** provide opportunities for high school students to take college-level courses offered by colleges, and earn concurrent credit toward a high school diploma and a college degree while still in high school. These programs are for high school-enrolled students who are academically prepared to enroll in college and are interested in taking on additional coursework. For example, students who want to study subjects not offered at their high school may seek supplemental education at colleges nearby. Dual enrollment/dual credit
programs do not include the Advanced Placement (AP) program or the International Baccalaureate Diploma Programme.
- **Gifted and talented programs** are programs during regular school hours that provide special educational opportunities including accelerated promotion through grades and classes and an enriched curriculum for students who give evidence of high achievement capability in areas such as intellectual, creative, artistic, or leadership capacity, or in specific academic fields.
- **International Baccalaureate (IB) Diploma Programme**, sponsored by the International Baccalaureate Organization, is designed as an academically challenging and balanced program of education with final examinations that prepares students, usually aged 16 to 19, for success at university and life beyond.
- **Nonbinary** means not exclusively male or female. Transgender students may be reported as male, female, or nonbinary.

Special Instructions

- Gifted and talented (G/T) students are those identified as G/T or considered G/T by a school or

district, and enrolled in G/T programs that are designed to meet the educational needs of G/T students either directly or by offering G/T students a range of services. Range of services may include pull-out programs, advanced classes, varied grouping strategies, acceleration, differentiation of curriculum and instruction, dual enrollment, magnet schools, and specialized, self-contained schools.

- For a school that already disaggregates student enrollment data to include nonbinary students, the nonbinary category in the Program Enrollment module is OPTIONAL.
- For a school that does NOT already disaggregate student enrollment data to include nonbinary students, the nonbinary category in the Program Enrollment module is SKIPPED.
