

# KIAS Extract (Kansas)

Last Modified on 12/14/2025 8:45 pm CST

Tool Search: KIAS Extract

The KIAS Extract outputs information required on individual discipline incidents to generate the IDEA and Non-IDEA student discipline data specifically in regards to Bullying, Weapons and Drugs. All Data must be reported from July 1 to June 30. Only information required for the Kansas Integrated Accountability System (KIAS) is exported.

## Report Logic

One row reports per student per event with a resolution mapped to one of the following State Resolution Codes:

Name	Code	Description
OSS	510	Removal/Out-of-school suspension w/ service part year
OSS	520	Removal/Out-of-school suspension w/ service rest of year
ISS	450	In-school suspension
IAES	001	Removed to another ED setting
IAES	002	Removed to another ED setting (IDEA)
Expulsion	550	Expulsion with Services - partial school year
Expulsion	555	Expulsion with Services - rest of school year
Expulsion	560	Expulsion without Services - partial school year

Name	Code	Description
Expulsion	565	Expulsion without Services - rest of school year
Law Enforcement	730	Referred to local law enforcement - Misdemeanor charges Law enforcement Referral 02
Law Enforcement	750	Referred to local law enforcement - Felony charges Law enforcement Referral 01

The student must have an active enrollment in the selected school on the date of the incident in order to report.

- When an event has multiple identical resolutions, the duration of the total number of resolutions is summed and reported in one row.
- When an event has multiple resolutions that are different, the information reports in a separate row.

Data does not report when:

- the student's enrollment record is marked as State Exclude or No Show.
- the grade level of enrollment is marked as State Exclude.
- the calendar of enrollment is marked as State Exclude.

The following state resolution codes are categorized as follows:

- Out-of-School Suspension - 510 and 520
- In-School Suspension - 450
- Expulsion - 550, 555, 560, 565
- Days of Removal by School Personnel - 001, 002
- Special Education Expedited Due Process Hearing Officers Determination - 470

An incident needs to be marked as Complete in order to report. This is done on the Incident Detail Information editor in Behavior Management.

## Validate KIAS Data

Use the [Data Validation Report](#) to correct any student data prior to the submitting the KIAS file to the state. Validation Groups and Validation Rules are provided by Infinite Campus for KIAS. These groups are used to return a list of students who meet the assigned rules for each group.

Administrators may need to add User Groups to the Validation Groups in order for users to generate the Data Validation Report. See the [Validation Groups](#) article for more information.

Data Validation Report - KIAS Invalid Discipline Method

If the Validation Report does not allow the selection of a Group, use the **Preview** option on the Data Validation Groups tool. That Preview report displays the same information as the Data Validation Report.

Validation Group Report Preview

Modifications to the Validation Rules and Validation Groups can be made if your district has purchased the [Campus Analytics Suite](#); otherwise, they are read-only.

Users select the **Students with Invalid Discipline Method** Data Validation Group, which returns a list of students who meet the rule criteria but is missing a piece of information that is needed in

the KIAS Extract.

- [Special Education Students with an Invalid Discipline Method on Behavior Resolution](#), reported as Discipline Method for IDEA Student (field 16) in the KIAS Extract
- [Non-Special Education Students with an Invalid Discipline Method on Behavior Resolution](#), reported as Discipline Method for Non-IDEA Student (field 17) in the Extract

The report firsts list a Summary of the issues found and the total number of occurrences.

District: USD 83

Data Validation Report Results

## Special Education Students with Invalid Discipline Method on Behavior Resolution

This validation rule returns students who are receiving Special Education services who have a Behavior Event where a Weapon is involved, but the assigned **Firearm Discipline Method** on the Behavior Resolution is NOT one of the following:

- 1 - Expulsion that was modified to less than one-year and received educational services under IDEA
- 2 - One year expulsion and received educational services under IDEA
- 3 - No expulsion because the student was removed for other reasons such as death, withdrawal, or incarceration
- 4 - Another type of disciplinary action
- 5 - No type of disciplinary action was taken

To correct the data, locate the Behavior Resolution that returned on the report in Behavior Management. Review the assigned Firearm Discipline Method for accuracy and modify as needed to be one of the values listed above.

*Approved Behavior Resolutions for Students Receiving Special Education Services*

Once modified and the issues returned in the Validation Report have been addressed, generate the KIAS Extract and continue with the submission process.

## Non-Special Education Students with Invalid Discipline Method on Behavior Resolution

This validation rule returns students who are NOT receiving Special Education services who have a Behavior Event where a Weapon is involved, but the assigned **Firearm Discipline Method** on the Behavior Resolution is NOT one of the following:

- 6 - One year expulsion and no educational services (including alternative placement with

educational services).

- 7 - One year expulsion and educational services (or alternative placement with educational services).
- 8 - Expulsion modified to less than one year and no educational services (including alternative placement with educational services).
- 9 - Expulsion modified to less than one year and educational services (or alternative placement with educational services)
- 10 - No expulsion because the student was removed for other reasons such as death, withdrawal, or incarceration.
- 11 - Another type of disciplinary action.
- 12 - No disciplinary action was taken.

To correct the data, locate the Behavior Resolution that returned on the report in Behavior Management. Review the assigned Firearm Discipline Method for accuracy and modify as needed to be one of the values listed above.

## Report Editor

Data Element	Description
<b>Start Date, End Date</b>	The dates by which student's enrollment must be active in order to be included on the report. Use the <i>Calendar</i> icon to select a new date or enter the date in the field in <i>mmddyy</i> format.
<b>Format</b>	Determines the display of the report. This extract can be generated in CSV (State Format) or HTML. Use the HTML format for testing and data review prior to submitting the data to the state. Use the State Format for submitting the data to the state.

Data Element	Description
<b>Ad hoc Filter</b>	Select which students to include in the extract by choosing a filter that was created in the Filter Designer.
<b>Select Grades</b>	Indicates which students are included in the extract. Only those students enrolled in the selected grade levels are included.
<b>Calendar Selection</b>	Select the calendar of enrollment from which to pull student data. Calendars can be chosen by the active year, by the school name or by the year.
<b>Report Generation</b>	Choose the Generate Extract button to display the results of the chosen items immediately. Choose the <a href="#">Submit to Batch</a> option to generate the report at a specified time. This option is helpful when generating large amounts of data.

## Generate the Extract

1. Enter a **Start Date** and **End Date** for the report.
2. Select the **Format** of the report.
3. Use the **Ad hoc Filter** to select students already included in a filter. This is not required.  
When not chosen, all students who have the appropriate enrollment start or end status during the entered date range are included.
4. Select the desired **Grades** to include in the extract.
5. Select the **Calendars** to include in the file.
6. Click the **Generate Extract** button. Or generate the extract at a specified time using the **Submit to Batch** button. The file appears in a new window in the selected format.
