The ISAT Student Extract is used to collect student enrollment information.

Report Logic

A record reports for each student enrollment active on the Snapshot Date entered. Students must have a Student State ID to report. Enrollments marked as State Exclude or No Show or in a grade level or calendar marked as State Exclude are not reported.

Results are sorted by Student State ID, then by State School Number

Generating the Extract

1. Enter a **Snapshot Date** in *mmddyyyy* format or by clicking the calendar icon and selecting a date.
2. Determine which students to include in the extract by selecting a **Grade** or **Ad hoc Filter**.
3. Enter a **File Identifier** to distinguish the extract. The extract is identified by concatenating this value with the date and timestamp when the report was generated.
4. Select a **Format** to generate the extract. Use *HTML* for data review and verification and *State Format (CSV)*
5. Select a **Calendar** from the list. More than one can be selected.
6. Click **Generate Extract** to generate the report in the indicated format or **Submit to Batch** to schedule when the report will generate.

Users have the option of submitting a report request to the batch queue by clicking **Submit to Batch** instead of Generate Extract. This process allows larger reports to generate in the background without disrupting the use of Campus. For more information about submitting a report to the batch queue, see the [Batch Queue](#) article.
