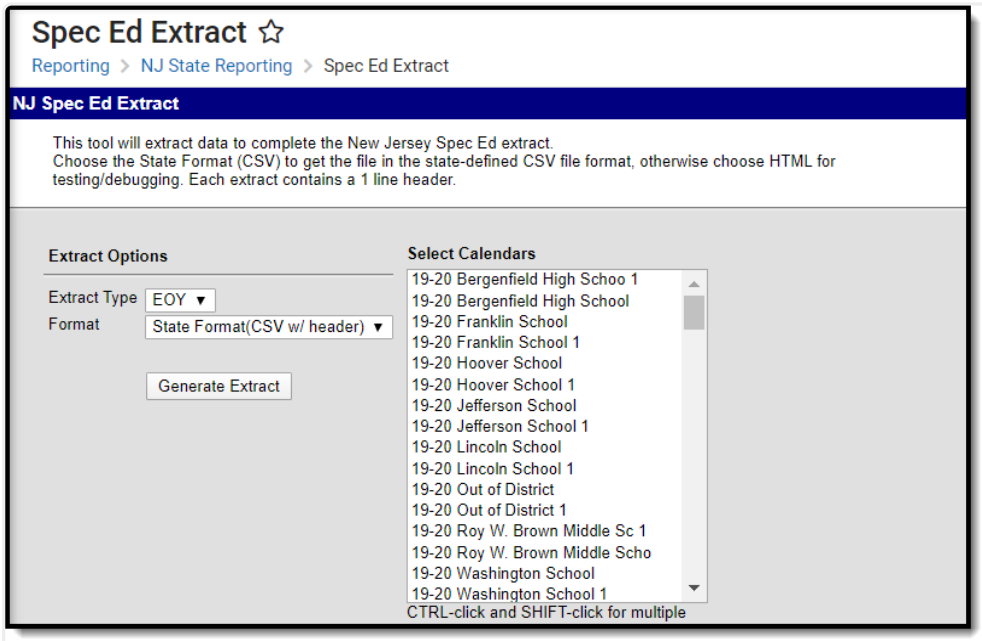
The Special Education Extract reports a summary of special education students who have exited special education programming.



Special Ed Extract

The extract reports data in sections of 1 (basic demographic information and Federal Special Education Categories), Section 2 (Ethnicity and Exit information) and 3 (breakouts by each special education category and student age).

Report Logic

The report includes the total number of students referred, initially classified, reevaluated, de-classified and instructed at home by age group and federal disability category.

Classifications	Reporting Logic
Referrals	Reports students who were referred for evaluation, ages 3-21. This does not include students who: • Transferred into the district • Were already classified in another district • Were referred only for speech/language services • Attend non-public schools

Classifications	Reporting Logic
Initial Classifications	Reports Students who were found eligible for special education and related services for the first time according to the federal disability category. This number should not be larger than the number of reported referrals, unless some of the referrals were carry-overs from the previous year.
Reevaluations	Report the number of resident students by age group who were reevaluated. I • If a student's eligibility category was changed, that student reports with the new federal disability category. • If a student was declassified, that student reports using the previous eligibility category. • If a reevaluation was started but not completed before the end of the school year, that student counts in the next year. • Students who were eligible for speech-language services and were subsequently referred to a child study team for evaluation to determine their eligibility for special education and related services, report as Referred and, if eligible, report under Initial Classification, instead of Reevaluated.
Declassified	Reports the number of resident students by age group (3-5; 6-21) who were declassified (returned to general education) according to the federal disability category from which they were declassified.
Home Instruction	Reports the unduplicated number of resident students by age group (3-5; 6-21) by federal disability category who received home instruction for a portion of the school year according to an individualized education program.
