Tool Search: KAN-Service Extract

The KAN-SERVICE Export reports Special Education and Gifted data, providing a format that can be submitted to the Kansas Department of Education.

Report Logic

The following logic is used to report students:

- Only students who have an enrollment in the selected calendar(s) and a locked IEP for that calendar year are included in the report.
- Students report if the student's enrollment record has a GI: Gifted code and a locked KS Gifted PLP for the selected calendar year.
- Students only report if there is an active enrollment in the selected calendar as of the effective date chosen on the report editor. If the effective date is blank, any student who has an enrollment in the chosen calendar(s) and a locked IEP/PLP is eligible to be included on the report.
- One record per locked IEP/PLP report.
- If a student has a locked IEP/PLP for the chosen calendar year, but does not have any services defined in the IEP/PLP (no service code), the student does not report.
- Students only report a SPED instruction service if the number of days are greater than zero. If the Number of Sessions field is zero, the service instance is excluded from the report.

Each student record contains 1 header (fields 1-28) and at least 1 set of service data (fields R1-R13). For students receiving more than one service, additional sets of service data are appended to the student's record.

Report Editor

The following defines the available options on the report editor.

Editor Option	Description
Effective Date	The date by which student's enrollment must be active in order to be included on the report. The current date is entered as the default date. Use the <i>Calendar</i> icon to select a new date or enter the date in the field in <i>mmdyy</i> format.
Ad hoc Filter	Selection narrows the students that may be included (if logic requirements are met) in the extract. Ad hoc filters are created in the Filter Designer .
Format	Determines the display of the report. This extract can be generated in CSV, HTML or the State Format (tab delimited). Use either CSV or HTML formats for testing and data review prior to submitting the data to the state. Use the State Format for submitting the data to the state.
Calendars	Selection indicates the calendar of enrollments that are included in the report.

Generate the KAN-SERVICE Export

1. Enter the **Effective Date**.
2. Select an **Ad hoc filter**, if desired.
3. Select the desired **Format**.
4. Select the **Calendars** to include in the export.
5. Click the **Generate Report** button. The extract displays in a new window in the selected format.
