Tool Search: Estimated Enrollment Extract

The Charter School Estimated Enrollment Extract reports students actively enrolled as of the Effective Date selected on the report editor for the school selected in the Campus toolbar. The report can only be generated in .CSV format.

This report is no longer collected by the Arizona Department of Education and remains within Campus for retrieval of historical data which can be sent to the state for auditing purposes.

Note: Charter schools are still allowed to use the Estimated Enrollment Extract for sending information to the Arizona Department of Education.

Users should submit data to the state via Ed-Fi (AZeds) functionality. For more information about Ed-Fi, see the following article: [Arizona Ed-Fi Information](#).
