

# Staff Credentials Import (Maine)

Last Modified on 10/21/2024 8:21 am CDT

[Logic and Validations](#) | [Import Layout](#)

Tool Search: Staff Credentials

The Staff Assignment Import includes people who have a District Assignment records within the effective year and effective data who have a State Title selected on their District Assignment record.

## Logic and Validations

The following describes the logic and validations used in the Staff Credentials Import.

- Each line represents a staff person's education degree or highly qualified status. A staff person may have more than one record.
- Any employment credential record that has an employment credential type of **HQ** or **ED** will be imported for those staff members who have a Staff State ID and an active district employment record.
- A match is done using the SAUID and the StaffStateID.

## Import Layout

The following table lists the data elements included in the layout.

See the [Credentials](#) page for more information.

Data Element	Description	Format, Type and Length	Campus Database	Campus Interface
<b>SAUID</b>	The district's state-assigned identification number. The following situations will cause an error to occur upon importing: <ul style="list-style-type: none"> <li>• If field is not populated</li> <li>• If entry is not a valid SAUID</li> </ul>	Numeric, 4 digits	district.districtID	System Administration Resources > District Information > District Number
