Reporting > SD State Reporting > Fall Enrollment Census Count

Fall Enrollment Census Count

This extract will pull student demographic data for students who are enrolled on the last Friday of September. This data is used to generate a fall enrollment head count.

Data will be pulled for the year and district selected in the main toolbar. If you would like to run this report for all schools across all districts, in the main toolbar select 'All Districts' as the District. When running this extract for all schools across all districts, please be patient the extract may take awhile to generate.

Choose one of the State Formats to get the extract in a comma or tab separated format. Otherwise, choose the HTML format for testing/viewing on screen.

Fall Enrollment Census Count Editor (State Edition)

Report Logic

The following report logic applies to the Fall Enrollment Census Count

- One record is reported for each enrollment. A student with multiple enrollments in the same school year, will have multiple records reported.
- All students enrolled on the last Friday of September will appear on the report.
- The following will automatically be excluded from appearing on the extract
 - **Calendars Excluded**
 1. Schools designated as Home School (State School Number = 99): System Administration> Resources> State School Number = 99
 2. Calendars marked as Exclude: System Administration> Calendar> Calendar> Calendar> Exclude
 - **Students Excluded**

1. Student's not enrolled as of the last calendar Friday in September (i.e 2009 - 9/25/2009, 2010 - 9/24/2010).
2. Percent enrolled equal to or less than 49%: Student Information> General> Enrollments> State Reporting Fields> Percent enrolled = 49 or less than 49.
3. Students marked as State Exclude: Student Information> General> Enrollments> State Reporting Fields> State Exclude.

Special Education data reports from multiple places. Depending on the selected school year, data reports from different areas.

When the selected school year is 2024-25 or earlier, Special Education information reports from the student's Enrollment record for that year.

When the selected school year is 2025-26 or later, Special Education information reports from the Evaluation, Plan, Summary, and Enrollment data. For each field on the report, a logic check is performed in the following order:

1. **Evaluation** - the most recent Start Date that is on or before the effective date if one is selected (or December 1 of the selected school year if one is not selected) and not more than three years in the past, AND has a locked status.
2. **Plan** - the most recent start date that is on or before the effective date if one is selected (or December 1 of the selected school year if none is selected) and not more than one year in the past, AND has a locked status.
3. **SPED Summary** - the start date is on or before the effective date if one is selected (or December 1 of the selected school year if none is selected) and does not have an end date. When that is not found and there is summary data with a start date that is on or before the effective date if one is selected (or December 1 of the selected school year if none is selected) and the end date is after the effective date if one is selected (or December 1 of the selected school year if none is selected).

Report Editor

The following table defines the fields available on the Fall Enrollment Census Count Editor.

Editor Field	Description
Extract Format	<p>The format in which the report generates. Options include:</p> <ul style="list-style-type: none"> • State Format (CSV), used when submitting reports to the state. • State Format (TSV), used when submitting reports to the state. • HTML format, used for data review and verification
Calendar(s)	<p>The calendar(s) from which data is pulled for the report. The calendars that are available for selection depend on the District selected in the Campus Toolbar. If All Districts is selected in the toolbar, this field will become a checkbox indicating that All Calendars are selected.</p>

Generate the Report

1. Select the **Format** in which the extract should generate.
2. Select the **Calendar(s)** to be included in the report.
3. Click **Generate Extract** to generate the report in the desired format.
