Tool Search: SD December Child Count

This information is current as of the Campus.2527 release (June 2025).

The South Dakota December Child Count Extract is an unduplicated count of all children with disabilities age 3-21 receiving Special Education and related services according to an individualized education program (IEP) as of the Effective Date entered or December 1 of the reporting year.

SD December Child Count Report

Report Logic

See the [South Dakota Enrollments](#) article and the [South Dakota Special Education Summary](#) for additional information.

Students whose enrollment records meet ALL of the following criteria are included in this report:

- **Enrollment Start Date** is on or before December 1 or the entered Effective date of the reporting year.
- **The Enrollment End Date must be blank or** after December 1 or the entered Effective date of the reporting year.
- **Percent Enrolled** must be greater than 0.
- **Resident District** must not equal any of the following districts:
 - 99087: Out of State IA
 - 99088: Out of State NE
 - 99089: Out of State WY
 - 99090: Out of State MT
 - 99099: Out of State
- **Resident District** can be one of the following as long as the Enrollment Status is NOT M, P, C or W.
 - 99085: Out of State ND
 - 99086 : Out of State MN
- Data reports as of the entered Effective Date or December 1 of the reporting year when the Effective Date is not entered.
- The student's age must be equal to or greater than 3 as of December 1 or as of the Effective date of the reporting year.
- The student's age must be 21 on or after July 1 as of the reporting year. When a student turns 21 before July 1, they do not report.
- When the Enrollment Status (State Funding Code) is T or B, Resident District must be 20001: Eagle Butte. When it is not 20001:Eagle Butte, the student is excluded from report.

The Resident District must match the enrolled district during the report generation to report a student.

Students whose Special Education Summary records meet ALL of the following criteria are included in this report:

- **Special Ed Program** (status) or **Special Ed Category** (setting) or **Special Ed Primary Disability** fields are populated.
- The Special Ed End Date must be blank or after December 1 or the Effective date of the reporting year.

In State Edition, the District ID and District Name field use the following logic for State Funding Code:

- When State Funding Code is **E, J, M, R, S** or **O**, the **Serving District** reports.
- When State Funding Code is **G, P C** or **W**, the **Resident District** reports.
- When State Funding Code is **T** or **B** AND **Resident District** is **20001**, the **Serving District** reports.
- When the Resident District Number is **99085** or **99086**, the **Serving District** reports.
- For all other instances, the Resident District reports. When that field is not populated, the District assigned to the Calendar reports.

Special Education data reports from multiple places. Depending on the selected school year, data reports from different areas.

When the selected school year is 2024-25 or earlier, Special Education information reports from the student's Enrollment record for that year.

When the selected school year is 2025-26 or later, Special Education information reports from the Evaluation, Plan, Summary, and Enrollment data. For each field on the report, a logic check is performed in the following order:

1. **Evaluation** - the most recent Start Date that is on or before the effective date if one is selected (or December 1 of the selected school year if one is not selected) and not more than three years in the past, AND has a locked status.
2. **Plan** - the most recent start date that is on or before the effective date if one is selected (or December 1 of the selected school year if none is selected) and not more than one year in the past, AND has a locked status.
3. **SPED Summary** - the start date is on or before the effective date if one is selected (or December 1 of the selected school year if none is selected) and does not have an end date. When that is not found and there is summary data with a start date that is on or before the effective date if one is selected (or December 1 of the selected school year if none is selected) and the end date is after the effective date if one is selected (or December 1 of the selected school year if none is selected).

Report Editor

Editor Field	Description
Extract Format	The format in which the report generates. Options are CSV, DOCX, HTML, PDF, or XML.
Effective Date	Data reports as of this date. When not populated, data reports as of December 1 of the reporting year.
Calendars	The calendar(s) from which data is pulled for the report. Calendars are listed by school and depend on the year and school selected in the Campus Toolbar.

Generate the Report

1. Select the **Format** in which the report should generate.
2. Enter the **Effective Date**, if desired.
3. Indicate which **Calendar(s)** should be included in the report.
4. Click **Generate Extract** to generate the report in the desired format.

When an Effective Date is entered, the report header displays that entered date instead of December 1 next to the report name.
