[Schedule Batch Editor](#) | [Generate Saved Schedule Reports](#) | [Generate Schedule Reports by Selecting Display Options](#)

Tool Search: Schedule Batch Report

The Schedule Batch Report prints student schedules for the selected calendar en masse, one page per student suitable for handing out. This report allows users to select a saved schedule report with pre-selected schedule options that are set in the Report Preferences tool. Users can select Display Options instead of selecting a pre-saved report.

The screenshot shows the 'Schedule Batch Report' tool interface. At the top, there are navigation icons for a menu, search, and the Infinite Campus logo. The main title 'Schedule Batch Report' is displayed with a star icon. Below the title, a sub-header 'Schedule Batch Report' is shown in a dark blue bar. A descriptive text box states: 'This report will batch print student schedules, 1 page per student suitable for handing out to students. This is a very complex report, so try to limit the number of students run per batch.' The configuration area includes 'Report Options' (set to 'Use the default format'), 'Format: Table; Group By Course', and 'Display Options'. Under 'Display Options', there is a section for selecting students: 'Which students would you like to include in the report?' with a radio button for 'Grade' and a dropdown menu showing 'All Students' and grade levels 08, 09, 10, 11. There is also an 'Ad Hoc Filter' option and an 'Enrollment Effective Date' field set to '01/18/2022'. Below this, there is a section for sorting: 'How would you like the report sorted?' with radio buttons for 'Alpha', 'Grade/Alpha', 'Zip', and 'Teacher', with 'Alpha' selected. The 'Report Format' is set to 'PDF'. At the bottom, there are two buttons: 'Generate Report' and 'Submit to Batch'. Below these buttons, there is a 'Refresh' button and a 'Show top 50' dropdown. A message indicates 'tasks submitted between 01/11/2022 and 01/18/2022'. A 'Batch Queue List' table is shown with columns: 'Queued Time', 'Report Title', 'Status', and 'Download'. The table is currently empty. The footer of the tool window contains the text 'Schedule Batch Report'.

See the [Scheduling & Courses Reports Tool Rights](#) article for information about rights needed to use this tool.

# Schedule Batch Editor

Option	Description
<b>Report Selection</b>	<p>Select a saved schedule to generate from the <b>Report Options</b> dropdown. These options are created in the <a href="#">Report Preferences</a> tool in System Administration.</p> <p>In order to see the Display Options and make selections, users must have tool rights to System Administration &gt; Preferences &gt; Reports.</p> <p>Select the <b>Display Options</b> to select the items to include on the schedule. These selections are not saved and need to be re-selected each time the report is generated.</p> <p>When the Display Options link is selected, the report editor displays the options that can be chosen. Use the <b>Close Display Options</b> to return to the original view of the report editor.</p>
<b>Student Selection</b>	<p>Students can be selected for the Schedule Batch by either a <b>Grade Level</b> or an Ad hoc Filter. Available grade levels display based on the school selected in the Campus toolbar. Ad hoc Filters are created in the Ad hoc Reporting <a href="#">Filter Designer</a> and only report the students included in that filter who meet the other selected criteria.</p> <p>Enter an <b>Effective Date</b>. This date is used to include only active students as of the entered date. This date displays the current date, but it can be changed by entering the date in <i>mmddyy</i> format or by selecting the Calendar icon to choose a date.</p> <p>For students who have more than one primary address, determine if multiple schedules should be printed. Mark the <b>Print only primary addresses</b> checkbox accordingly.</p>

Option	Description
<b>Sort Options</b>	<p>The schedules can be sorted in the following ways:</p> <ul style="list-style-type: none"> <li>• <b>Alphabetical</b>, which sorts the schedules by the student's Last Name, First Name, Middle Name</li> <li>• <b>Grade/Alphabetical</b>, which sorts the schedules by grade level (lowest grade level prints first) then alphabetical by last name.</li> <li>• <b>Zip Code</b>, which sorts the schedules in zip code order for bulk mailing purposes.</li> <li>• <b>Teacher</b>, which sorts the schedules by the Display Name assigned on the Course Section for the selected period and effective date entered on the report editor based on the selected Calendar in the toolbar. Students in a Course Section that does not have a Display Name entered are grouped together, and print first.</li> </ul>
<b>Report Format</b>	<p>The report can be generated in PDF or DOCX format.</p>
<b>Report Generation</b>	<p>Use the Generate Report button to display the results of the report immediately. Or, choose the Submit to Batch button to choose when the report generates. For a complex report like the Schedule Batch, and for a large set of students, using Submit to Batch is recommended.</p> <p>See the <a href="#">Batch Queue</a> documentation for additional information on using Batch Queue functionality.</p>

## Generate Saved Schedule Reports

1. Select the desired schedule format from the **Report Options** dropdown list.
2. Select the **Grade Level** of the students to include on the report. Or, select the students from an **Ad HocFilter**.
3. Enter an **Enrollment Effective Date**. This date defaults to the current date. If this date is outside of the calendar range, no records are returned. This entry only prints student schedules for those students who were actively enrolled on that date.
4. Mark the **Print only primary addresses** checkbox if more than one schedule should be printed for students who live in multiple households.
5. Select the **Sort Options**. Schedules can be sorted alphabetically, by grade and alphabetically, by zip code (for bulk mailing purposes) or by teacher.
6. Select the desired **Report Format**.
7. Click the **Generate Report** button to display the report immediately, or the Submit to Batch button to choose when the report generates.

## Generate Schedule Reports by Selecting Display Options

1. Select the **Display Options** link.
2. Select the desired options to include on the schedule.
3. Select the **Grade Level** of the students to include on the report. Or, select students using an **Ad Hoc Filter**.
4. Enter an **Enrollment Effective Date**.
5. Mark the **Print only primary addresses** checkbox if more than one schedule should be printed for students who live in multiple households.
6. Select the desired **Sort Option**.
7. Select the desired **Report Format**.
8. Click the **Generate Report** button to display the report immediately, or the **Submit to Batch** button to choose when the report generates.

Depending on the options selected, the schedule may print more than one page.
