Tool Search: MOSIS Extracts

The Student Assignment extract is generated two times during the school year, in October and June (for summer school). The extract reports the courses taken by a student during the regular school year or in summer school.

When a course section has multiple primary teachers associated with it, a record for each teacher who taught that section during the date range entered on the extract editor reports.

The screenshot shows the 'MOSIS Extracts' interface. At the top, there's a search bar and a navigation menu. The main heading is 'MOSIS Extracts' with a star icon. Below it, a breadcrumb trail reads 'Reporting > MO State Reporting > MOSIS Extracts'. A blue banner contains the text: 'This tool will extract data to complete several types of the MOSIS Phase III reporting collections. Choose the State Format to get the file in the state defined comma separated file format, otherwise choose one of the testing/debugging formats. Please be aware of the date range selection, it is recommended to report from the first calendar day to the current day.'

The interface is divided into two main sections. The left section, titled 'Extract Options', contains the following fields:

- Extract Type:** A dropdown menu set to 'Student Assignment'.
- Reporting Period:** A dropdown menu.
- Report Protected Identities:** A checkbox.
- Report State Excluded Course Sections:** A checkbox.
- Report State Excluded Students:** A checkbox.
- Date Range:** Two date pickers with a range from an empty date to '11/10/2020'.
- Ad Hoc Filter:** A dropdown menu.
- Format:** A dropdown menu set to 'State Format(CSV)'.
- Generate Extract:** A button.

The right section, titled 'Select Calendars', asks 'Which calendar(s) would you like to include in the report?'. It has three radio button options: 'active year' (selected), 'list by school', and 'list by year'. Below these options is a scrollable list of school names for the '20-21' school year:

- 20-21 Abbott Elementary
- 20-21 Baird Elementary
- 20-21 Chowen Middle
- 20-21 Drew Middle
- 20-21 Ewing High
- 20-21 Fremont High

Report Logic

The Student Assignment Extract collects assignments for the entire regular school year in two cycles:

- The October data collection requires one or more records for each student in a given educator's teaching assignment.
- The June Summer School collected requires one or more records for each student in a given educator's teaching assignment.
- The June collection returns only for those calendars marked as Summer School.

Any course marked as **Exclude from State Reporting** is not included. Any Course Section that has an **Assignment Number** value of 0 is not included.

The educator must have a Teaching Assignment with a Position Code of 60.

This extract returns data on instructional and non-instructional periods for any student enrolled in any course at any time during the reporting period that is also reported in the [Course Assignment](#) extract.

Report Editor

The following fields are available for selection on the MOSIS Student Assignment Extract.

Extract Option	Description
Extract Type	Determines the extract that generates. Selection should be Student Assignment.
Reporting Period	Indicates the section of the school year for which student data is being reported. Each selection contains the same layout, but certain fields may be required in certain extracts, and optional in others.
Report Protected Identities	When marked, student identity information (last name, first name, etc.) reports from the Protected Identity Information fields.
Report State Excluded Course Sections	<p>When marked, course sections where the Assignment Number field on the Course Section editor has a value zero (0), those sections are included in the report, as long as the sections meet all other reporting population logic.</p> <p>Marking this checkbox also includes courses where the Exclude from State Reporting checkbox are marked on the Course editor.</p>

Extract Option	Description
Report State Excluded Students	<p>When marked, students who meet the report population requirements but their enrollment record is marked as State Exclude report along with all other records.</p> <p>When not marked, students marked as State Exclude on their enrollment record are excluded from the report.</p>
Optional Fields Allowed	When selected, optional fields are included in the extract. These optional fields may be blank depending on the available student data.
Date Range	Entered dates are used to return students enrolled during that time frame. Enter dates in <i>mmddyy</i> format or use the calendar icon to choose a date.
Ad hoc Filter	Selection includes only those students included in the filter.
Format	Determines how the extract generates. Use the State Format (CSV) when submitting the final data to MOSIS. Use the other available formats (HTML, Tab Delimited, XML) for data review and testing.
Calendar	Selected calendar indicates which students will be included in the report. Multiple calendars can be selected at one time; it is recommended that all calendars in a district not be selected as this increases the amount of time it takes to generate the extract. The calendar chosen in the Campus toolbar is already selected.
Generate Extract	Displays the selected calendar information and extract immediately for data review and printing purposes in one of the selected formats.

Generate the Student Assignment Extract

1. Select the **Student Assignment** report.
2. Select the **Reporting Period**.
3. Mark the **Report Protected Identities** checkbox, if desired.
4. Mark the **Report State Excluded Course Sections**, if desired.
5. Mark the **Report State Excluded Students** checkbox, if desired.
6. Mark the **Optional Fields Allowed** checkbox, if applicable.
7. Enter the **Date Range** for the selected reporting period.
8. Select any applicable **Ad hoc Filters**.
9. Select the **Format** of the extract.
10. Select which **Calendar(s)** to include within the extract.
11. Click the **Generate Extract** button.
