

# MOSIS Student Assignment (Missouri)

Last Modified on 03/06/2026 10:03 am CST

Tool Search: MOSIS Extracts

The Student Assignment extract is generated two times during the school year, in October and June (for summer school). The extract reports the courses taken by a student during the regular school year or in summer school.

When a course section has multiple primary teachers associated with it, a record for each teacher who taught that section during the date range entered on the extract editor reports.

**MOSIS Extracts** ☆  
Reporting > MO State Reporting > MOSIS Extracts

**MOSIS Extracts**

This tool will extract data to complete several types of the MOSIS Phase III reporting collections. Choose the State Format to get the file in the state defined comma separated file format, otherwise choose one of the testing/debugging formats. Please be aware of the date range selection, it is recommended to report from the first calendar day to the current day.

**Extract Options**

Extract Type: Student Assignment

Reporting Period: [dropdown]

Report Protected Identities:

Report State Excluded Course Sections:

Report State Excluded Students:

Date Range: [calendar] -- 11/10/2020 [calendar]

Ad Hoc Filter: [dropdown]

Format: State Format(CSV)

**Select Calendars**  
Which calendar(s) would you like to include in the report?

- 20-21 Fremont High

MOSIS Student Assignment Extract Editor

**Read** - Generate the MOSIS Student Assignment Extract.

**Write** - N/A

**Add** - N/A

**Delete** - N/A

# Report Logic

The Student Assignment Extract collects assignments for the entire regular school year in two cycles:

- The October data collection requires one or more records for each student in a given educator's teaching assignment.
- The June Summer School collected requires one or more records for each student in a given educator's teaching assignment.
- The June collection returns only for those calendars marked as Summer School.

Any course marked as **Exclude from State Reporting** is not included. Any Course Section that has an **Assignment Number** value of 0 is not included.

The educator must have a Teaching Assignment with a Position Code of 60.

This extract returns data on instructional and non-instructional periods for any student enrolled in any course at any time during the reporting period that is also reported in the [Course Assignment](#) extract.

All courses report on the extract when an End Dated Enrollment was active during any portion of the school year.

Reports from the most recent Primary Enrollment. When the student does not have a Primary Enrollment, a Partial Enrollment reports. When the student has no Partial Enrollment, a Special Ed Enrollment reports.

When a student has multiple enrollments, the latest P: Primary enrollment record within the selected reporting period reports. When a student has multiple P: Primary enrollment records for the same calendar that start and end on the same day, the enrollment record with the highest enrollment ID reports.

# Report Editor

The following fields are available for selection on the MOSIS Student Assignment Extract.

Extract Option	Description
<b>Extract Type</b>	Determines the extract that generates. Selection should be Student Assignment.
<b>Reporting Period</b>	Indicates the section of the school year for which student data is being reported. Each selection contains the same layout, but certain fields may be required in certain extracts and optional in others.
<b>Report Protected Identities</b>	When marked, student identity information (last name, first name, etc.) reports from the Protected Identity Information fields.

Extract Option	Description
<b>Report State Excluded Course Sections</b>	<p>When marked, course sections where the Assignment Number field on the Course Section editor has a value of zero (0) are included in the report, as long as they meet all other reporting population logic.</p> <p>Marking this checkbox also includes courses where the Exclude from State Reporting checkbox is marked on the Course editor.</p>
<b>Report State Excluded Students</b>	<p>When marked, students who meet the report population requirements but their enrollment record is marked as State Exclude report along with all other records.</p> <p>When not marked, students marked as State Exclude on their enrollment record are excluded from the report.</p>
<b>Optional Fields Allowed</b>	<p>When selected, optional fields are included in the extract. Depending on the available student data, these optional fields may be blank.</p>
<b>Date Range</b>	<p>Entered dates are used to return students enrolled during that time frame. Enter dates in <i>mmddyy</i> format or use the calendar icon to choose a date.</p>
<b>Ad hoc Filter</b>	<p>Selection includes only those students included in the filter.</p>
<b>Format</b>	<p>Determines how the extract generates. When submitting the final data to MOSIS, use the State Format (CSV). For data review and testing, use the other available formats (HTML, Tab Delimited, XML).</p>
<b>Calendar</b>	<p>The selected calendar indicates which students will be included in the report. Multiple calendars can be selected at one time; it is recommended that not all calendars in a district be selected, as this increases the amount of time it takes to generate the extract. The calendar chosen in the Campus toolbar is already selected.</p>
<b>Generate Extract</b>	<p>Generates the report.</p>

## Generate the Student Assignment Extract

1. Select the **Student Assignment** report.
2. Select the **Reporting Period**.
3. Mark the **Report Protected Identities** checkbox, if desired.
4. Mark the **Report State Excluded Course Sections**, if desired.
5. Mark the **Report State Excluded Students** checkbox, if desired.
6. Mark the **Optional Fields Allowed** checkbox, if applicable.
7. Enter the **Date Range** for the selected reporting period.
8. Select any applicable **Ad hoc Filters**.
9. Select the **Format** of the extract.
10. Select which **Calendar(s)** to include within the extract.

11. Click the **Generate Extract** button.
