**PATH:** *WA State Reporting > Ethnicity File (L)*

The Student Ethnicity File (L) Extract collects one record for each student served in the district during the current school year along with ethnicity data associated with the student.

The screenshot shows the 'WA State Reporting' interface. On the left, a sidebar lists various reporting options, with 'Ethnicity File (L)' highlighted in red. The main content area is titled 'Ethnicity File (L)' and contains a description of the file. Below the description, there are two sections: 'Extract Options' and 'Select Calendars'. The 'Extract Options' section includes fields for 'Start Date' and 'End Date' (set to 05/14/2015), an 'Ad Hoc Filter' dropdown, and a 'Format' dropdown set to 'Tab Delimited'. There are buttons for 'Generate Report' and 'Submit to Batch'. The 'Select Calendars' section has three radio buttons: 'active year' (selected), 'list by school', and 'list by year'. Below these, a list of calendars is shown, including '14-15' and '14-15 Creekside Middle School'. A note at the bottom right says 'CTRL-click or SHIFT-click to select multiple'.

## Report Logic

Logic reports one record per State Race ethnicity selected for a student.

## Generating the Extract

1. Input the **Start** and **End Date** fields by clicking on the field and typing in the date or clicking on the calendar icon and selecting the date.
2. Select a **Format** in which the report will generate from the dropdown options. Available formats include: Tab Delimited, CSV, and HTML.
3. Select the **Calendars** to include in this report.
4. Click **Generate Extract** to generate the report in the indicated format or **Submit to Batch** to schedule when the report will generate.

Users have the option of submitting report request to the batch queue by clicking **Submit to Batch** instead of Generate Extract. This process will allow larger reports to generate in the background, without disrupting the use of Campus. The generated extract is available in the Process Inbox. For more information about submitting a report to the batch queue, see the [Batch Queue](#) article.

Only the header row will report if there are no records reported in the extract.
