## [Student Demographics Extract Layout](#)

Tool Search: SD Extract

This information is current as of the Campus.2527 (June 2025) release.

The Student Demographics extract collects basic student demographic data such as name, birth date and Race/Ethnicity. To generate this extract, select **Student Demographics** from the Extract Type field on the [SD Extract](#) Editor. Multiple records can report for a single student if the student's name or identifying information has changed while at the district.

The screenshot shows the 'SD Extract' tool interface. At the top, there is a breadcrumb trail: 'Reporting > SD State Reporting > SD Extract'. Below this is a section titled 'SD State Extracts' with a description: 'This tool will extract data to complete several formats of the SD State-defined reporting formats. Choose the State Format to get the file in the state defined tab separated file format, otherwise choose one of the testing/debugging formats.' The interface is divided into two main sections: 'Extract Options' and 'Select Calendars'. In 'Extract Options', the 'Extract Type' is set to 'Student Demographics' and the 'Format' is set to 'State Format(CSV)'. There is a 'Generate Extract' button. In 'Select Calendars', the question is 'Which calendar(s) would you like to include in the report?'. There are three radio buttons: 'active year' (selected), 'list by school', and 'list by year'. Below the radio buttons is a list of school years: '23-24', '23-24 C.C. Lee Elementary', '23-24 Central High School', '23-24 Holgate Middle School', '23-24 JDC', '23-24 Lincoln Elementary', '23-24 May Overby Elementary', '23-24 Mike Miller Elementary', and '23-24 New Beginnings'.

### *Student Demographics Extract*

Special Education data reports from multiple places. Depending on the selected school year, data reports from different areas.

**When the selected school year is 2024-25 or earlier,** Special Education information reports from the student's Enrollment record for that year.

**When the selected school year is 2025-26 or later,** Special Education information reports from the Evaluation, Plan, Summary, and Enrollment data. For each field on the report, a logic check is performed in the following order:

1. **Evaluation** - the most recent Start Date that is on or before the effective date if one is selected (or December 1 of the selected school year if one is not selected) and not more than three years in the past, AND has a locked status.
2. **Plan** - the most recent start date that is on or before the effective date if one is selected (or December 1 of the selected school year if none is selected) and not more than one

year in the past, AND has a locked status.

3. **SPED Summary** - the start date is on or before the effective date if one is selected (or December 1 of the selected school year if none is selected) and does not have an end date. When that is not found and there is summary data with a start date that is on or before the effective date if one is selected (or December 1 of the selected school year if none is selected) and the end date is after the effective date if one is selected (or December 1 of the selected school year if none is selected).
