

Google Drive

Last Modified on 12/14/2025 8:45 pm CST

Integrating Campus with Google Drive allows teachers and students to use Google Drive files in the classroom. Drive files can be used in the following ways:

- Attaching a Drive file to an assignment that students can open and interact with based on the teacher's sharing preferences.
- Allowing students to attach and submit Drive files to assignments in [Campus Student](#).

Prior to using Google Drive, the Campus administrator must complete the [Configuration](#) process and enter [Preferences](#). See the [Google Drive Integration Troubleshooting](#) article if you're having issues.

This [Attach Content](#) article describes using these options as a teacher.

Teachers must be given the **Google Drive** tool right in Campus Instruction to have access to these options.
