The End of Year Adjustments Report lists students whose Adj fields on the State Reporting Enrollment editor are not null or 00: Not Applicable within the Calendar. A student is included in the report when there is data in any one of the Adj. fields:

- Adj Cohort Year
- Adj Cohort School
- Adj Cohort Justification

Report Logic

When multiple calendars are selected, a record reports for every enrollment a student may have

in the calendar year(s) selected. Duplicate records may display for a single student.

When the student is marked as State Exclude, the student still reports as long as the Adj. Cohort fields are populated.

- When the Adj Cohort information within the single calendar is between multiple enrollments is the same, only one record reports.
- When the information between multiple enrollments is different, all differing records report.

Non-Binary Reporting

Schools can assign students a gender of M: Male, F: Female or N: Non-binary. This is done on the <u>Identities</u> tool and/or the <u>Demographics</u> tool.

Data Pipeline Extracts and other required extracts use the Legal Gender field included in the Protected Identity Information to report student identity information.

To properly record a gender of N: Non-Binary, on the Identities tool:

- 1. Assign the **Gender of N: Non-Binary** in the standard identify fields.
- Assign the Protected Identity Information Legal Gender field to M: Male, F: Female or N: Non-Binary.
- 3. Save the record when finished.
