Student Selection Criteria

The following lists the selection criteria used for Retained Students:

- A student who is enrolled in a grade level that is marked as State Exclude will appear on the report. However, if a student is enrolled as a state exclude student (marked on enrollment record) or enrolled in a calendar that is marked as state exclude, that student will not appear

on the report.

- Students must be enrolled in grades 04-12 who fall under the definition of retention.
- Students marked as Service Type S: Partial and N: Special Ed on their enrollment record do not report.
 - Students marked only S or N on their enrollment record do not report.
 - If the student has both P: Primary AND S or N in enrollments, only the P: Primary will be considered in report logic.

Students must have been enrolled on the last instructional day of the previous year. Students may have a withdrawal on the last day of instruction and still appear on the report.

When students meet the above criteria, two populations are pulled for the report:

Population 1:

- Students whose first enrollment in the current year is assigned the same state grade as their most recent enrollment in the previous year in the same district. Most recent enrollment and first enrollment is defined by the most recent start date.
- Students pull regardless of whether End Action is selected as R: Retained. If End Action is not R: Retained, however, the student will also display on the warnings.

Population 2:

- Students whose most recent enrollment in the previous year is marked as R: Retained for End Action and who have no enrollments in that same district in the current year. No Show enrollments do not count as enrollments for the purpose of this report and are ignored.

Student with a Supplemental School Year Program record within the Current Year will be excluded from the report, even if they did not advance state grade levels.

Generating the Retention Report

1. Select the appropriate **Format** for the selected extract type.
2. Select the appropriate **calendar(s)** to include in the report.
3. If all calendars should be selected, mark the **Select All** checkbox.
4. Click the **Submit to Batch** button. The report will be sent to the Batch Queue List found at the bottom of the editor.
5. Once the report has been generated, select the blue **Get report** text found the in the Download column. The report will appear in a separate window in the designated format.
6. If errors or warnings are found in the data, that information will appear first. To continue generation of the actual report, select the **Click Here** button at the top of the errors/warnings page to generate the report.

Understanding the Validation Report

The Validation Report allows districts and the state to identify students who have the one (or both) of the following issues:

#	Validation Text	Selection Criteria	Fields Outputted
WA01	<p>“Warning 01: Student grade levels are the same between enrollments; however, the previous year enrollment does not have an End Action = R: Retain. These records will appear in the Retention Report.”</p>	<p>Triggered if the End Action DOES equal ‘R’ and the current grade level is greater than the previous.</p> <p>If first enrollment of the current year is a No Show, warning will still trigger if either of the above criteria is met.</p> <p>Record will produce on retention report.</p>	<p>districtNumber schoolNumber districtStudentID stateStudentID lastName firstName dob endAction currentGrade previousGrade</p>

#	Validation Text	Selection Criteria	Fields Outputted
ER01	<p>“Error 01: Students previous year enrollment has End Action = R: Retain; however, student’s previous year enrollment and current year enrollment show advancement in grade levels. These records will not return in the Retention Report.”</p>	<p>Error triggered if student’s -1-year enrollment has an end action of R: Retain but the -1-year enrollment grade level is less than the grade level on the current year enrollment.</p> <p>Record will not produce on retention report.</p>	<p>districtNumber schoolNumber districtStudentID stateStudentID lastName firstName dob endAction currentGrade previousGrade</p>
