Tool Search: MOSIS Extracts

The Student Core extract collects descriptive data about students including the MOSIS student ID, residency status, membership, enrollment information, demographic data, federal program participation, state program participation, career education information and other program related areas.

The screenshot shows the 'MOSIS Extracts' tool interface. It includes a search bar at the top, a breadcrumb trail (Reporting > MO State Reporting > MOSIS Extracts), and a title 'MOSIS Extracts ☆'. Below the title is a description: 'This tool will extract data to complete several types of the MOSIS Phase III reporting collections. Choose the State Format to get the file in the state defined comma separated file format, otherwise choose one of the testing/debugging formats. Please be aware of the date range selection, it is recommended to report from the first calendar day to the current day.' The interface is divided into two main sections. The left section, 'Extract Options', contains fields for 'Extract Type' (set to 'Student Core'), 'Reporting Period' (set to 'October'), 'Report Protected Identities' (checkbox), 'Report State Excluded Students' (checkbox), 'Optional Fields Allowed' (checkbox), 'September Count Date' (set to '09/30/2020'), 'Ad Hoc Filter' (dropdown), and 'Format' (set to 'State Format(CSV)'). At the bottom of this section are 'Generate Extract' and 'Submit to Batch' buttons. The right section, 'Select Calendars', asks 'Which calendar(s) would you like to include in the report?' and has three radio button options: 'active year' (selected), 'list by school', and 'list by year'. Below these options is a list of schools for the '20-21' school year, with '20-21 Baird Elementary' highlighted. The list includes: 20-21 Abbott Elementary, 20-21 Baird Elementary, 20-21 Chowen Middle, 20-21 Drew Middle, 20-21 Ewing High, and 20-21 Fremont High.

All Student Core data extracted is used to populate the following Core Data screens within MOSIS:

- 02 - District LEP Census Data
- 11 - Special Education Placement Counts by Age
- 12 - Special Education Exiter Counts by Age

- 13 - Secondary Headcount
- 14 - Attendance
- 14A - Resident II Attendance
- 14B - Resident II Grade Point Average
- 15 - Home School/Free and Reduced Lunch
- 16 - Enrollment, Membership and Summer School
- 17 - Physical Fitness Assessment
- 30 - District-Level Census of Technology

Student Core Reporting Periods

Each Student Core reporting period serves a different purpose in completing each MOSIS screen. The Student Core Extract is broken down into five separate reporting periods, allowing users to meet MOSIS requirements.

Reporting Period	Collection Dates	Description
October	September 1 - October 15	The October Student Core data collection requires a single record for each student who has enrolled or was a member of a public school district on the last Wednesday in September. This file collects student enrollment and school of attendance data in order to determine district enrollment and membership counts. All students, pre-kindergarten through grade 12, report in the October file.
December	November 15 - December 15	The December Student Core data collection requires a single record for each student who is enrolled on December 1 and has an Individualized Education Plan (IEP). This file collects student enrollment and school of attendance data in order to complete the Special Education December 1 Child Count. All students, pre-kindergarten through grade 12, are reported in the December file.
February	January 17 - February 15	The February Student Core data collection requires a single record for each student who is enrolled or was a member of a public school district on the last Wednesday in January. This file collects student enrollment and school of attendance data in order to determine membership, free/reduced lunch counts, and midyear A+ graduates. All students, pre-kindergarten through grade 12, are reported in the February file.
April	March 14 - April 30	The April Student Core data collection requires a single record for each student that has taken a state assessment. This file collects student demographic data. All students, kindergarten through grade 12, are reported in the April Student Core file.

Reporting Period	Collection Dates	Description
June	May 15 - June 30	The June Student Core data collection requires a single record for each student that was enrolled at some point during the school year in the district or had dropped out or moved during the prior summer. Student Core in June collects all categories of student data in order to derive several “end of year” statistics. This includes the demographic data for graduates, dropouts, and transfers as well as data about A+ and physical fitness. All students, pre-kindergarten through grade 12, are reported in the June Student Core file.

Report Logic

The following logic applies to the noted reported period:

Reporting Period	Snapshot Date	Logic
October	Last Wednesday in September	One record reports per PK-12 actively enrolled student on the effective date entered on the extract editor.
December	December 1	One record reports per PK-12 student actively enrolled on the effective date entered on the extract editor AND has an active IEP. All students are reported who are actively enrolled as of the count date.
February	Last Wednesday of January	One record reports per PK-12 student actively enrolled on the effective date entered on the extract editor.
April	On or near district's MAP test day	A single record is reported for each student who has taken a state assessment. All students (KG-12) are reported in this file. A MAP Administration Date field is also used in reporting logic for fields Not Fay District and Not Fay School.
June	None	One record reported per PK-12 student who was enrolled at some time within the start and end date range entered on the Extract Editor, including graduated students, dropout students and transferred students. It also reports students who have dropped out or moved during the prior summer.

When a student is enrolled in more than one calendar selected in the Extract editor, the following

applies:

- When there are multiple enrollments in the same school, data from the most recent enrollment is used.
- When there are multiple enrollments in different schools, the data from the Primary enrollment is used.
- Summer School enrollments are not reported.

Optional Fields Allowed

Individual fields populate per submission based on the Optional Fields Allowed and whether it is listed as Optional/Required/Conditional by the state.

- When Optional Fields Allowed is NOT selected on the extract editor, the field MUST be NULL when it does not meet the condition OR is listed as optional or for that collection.
- When Optional Fields Allowed is selected on the extract editor, all fields are expected to return a value. Conditional fields may be blank when the student does not meet that condition.

No Show Students

- No Show students are **not** reported in the October, December, February and April reporting periods.
- No Show students may report in the June reporting period when the student entered and exited on the first day of school with the appropriate exit status.

Months in USA Calculation

When EL/ELL status is MY1, MY2, RCV or Immigrant status is Yes:

- When the student has been in the United States for less than 36 months, the number of months calculated between the Date Entered US and April 1 of the reporting year is reported.
- When the number of months is more than or equal to 36, the value 36 is always reported.
- Otherwise, a blank value is returned.
- When Immigrant status is No or Null, the field reports blank unless EL conditions are met.

Title III-related Fields

Within the date range selected on the extract editor, the most current school history record based on the Effective Date is used for the following fields:

- Title III
- Title III LEP
- Title III Immigrant

Enrolled All Years

- When a student is flagged as a No Show and the student does not enroll in another school in

the district, then the student should report 'N' in the EnrolledAllYear column.

- When a student is flagged as a No Show and the student ends their enrollment Prior to the September Count Date, then the student should report 'N' in the EnrolledAllYear column.
- When a student is flagged as a No Show and ends their enrollment after the September Count Date, then the student should report 'N' in the EnrolledAllYear column
- When a student is NOT flagged as a 'No Show' and the student ends their enrollment prior to the September Count Date, then the student should report 'N' in the EnrolledAllYear column.
- When a student is enrolled in the district since the September Count Date until the final day of school, then the student should report 'Y' in the EnrolledAllYear column.
- When a student is enrolled in the district since the September Count Date, ends an enrollment in one calendar and the next day starts a new enrollment in another calendar, then the student should report 'Y' in the EnrolledAllYear column
- EnrolledAllYear is only required in the June collection of the MOSIS Student Core.
- When ResidencyStatus = R2, the EnrolledAllYear column should report 'N'.

NLP: Not Receiving Services

- For EL/ELL reporting options, NLP reports only when the program status is EL and the Parent Declined checkbox is marked.
- When a student has an EL/ELL status of NLP, the student's Home Primary Language reports in the ELL Language field.

Report Editor

Different options are available for entry on the Extract editor depending on the chosen Reporting Period. The following defines the available Extract Options, noting the different fields.

Extract Option	Reporting Period	Description
Extract Type	All	Determines the extract that generates. Selection should be Student Core.
Reporting Period	All	Indicates the section of the school year for which student data is being reported. Each selection contains the same layout, but certain fields may be required in certain extracts, and optional in others.
Report Protected Identities	All	When marked, student identity information (last name, first name, etc.) reports from the Protected Identity Information fields.
Report State Excluded Students	All	<p>When marked, students who meet the report population requirements but their enrollment record is marked as State Exclude report along with all other records.</p> <p>When not marked, students marked as State Exclude on their enrollment record are excluded from the report.</p>

Extract Option	Reporting Period	Description
Optional Fields Allowed	All	When selected, optional fields are included in the extract. These optional fields may be blank depending on the available student data.
September Count Date	October April June	Displays the date of the September snapshot (last Wednesday in September). Modify the date by typing in <i>mmddyy</i> format or by using the calendar icon to choose a date.
December (Special Ed) Count Date	December	Displays the date of the December snapshot (December 1). Modify the date by typing in <i>mmddyy</i> format or by using the calendar icon to choose a date.
January Count Date	February	Displays the date of the January snapshot (last Wednesday in January). Modify the date by typing in <i>mmddyy</i> format or by using the calendar icon to choose a date.
MAP Administration Date	April	Date the MAP Assessment was administered. Enter the date by typing in <i>mmddyy</i> format or by using the calendar icon to choose a date. <i>This field is available for all Reporting Periods when the Optional Fields Allowed checkbox is selected.</i>
Date Range	April June	Entered dates are used to return students enrolled during that time frame. Enter dates by typing in <i>mmddyy</i> format or by using the calendar icon to choose a date.
Ad hoc Filter	All	Selection includes only those students included in the filter.
Format	All	Determines how the extract generates. Use the State Format (CSV) when submitting the final data to MOSIS. Use the other available formats (HTML, Tab Delimited, XML) for data review and testing.
Calendar	All	Selected calendar indicates which students are included in the report. Multiple calendars can be selected at one time; it is recommended that all calendars in a district not be selected as this increases the amount of time it takes to generate the extract. The calendar chosen in the Campus toolbar is already selected.
Generate Extract	All	Displays the selected calendar information and extract immediately for data review and printing purposes in one of the selected formats.

Extract Option	Reporting Period	Description
Submit to Batch	All	Delays the generation of the extract for data review and printing purposes for a designated time. See the Batch Queue documentation for more information.

Generate the Student Core Extract

1. Select the **Student Core Extract Type**.
2. Select the **Reporting Period**.
3. Mark the **Report Protected Identities** checkbox, if desired.
4. Mark the **Report State Excluded Students** checkbox, if desired.
5. Mark the **Optional Fields Allowed** checkbox, if applicable.
6. Enter the displayed **Count Dates** or **Date Range** fields, depending on which reporting period is selected.
7. Enter the **MAP Administration Date** when generating the **April Reporting Period** extract.
8. Select any applicable **Ad hoc Filters**.
9. Select the **Format** of the extract.
10. Select which **Calendar(s)** to include within the extract.
11. Click the **Generate Extract** button or the **Submit to Batch** button.
