Tool Search: Enrollment Census

The Enrollment Census Discipline extract is used to report student behavior incidents for state reporting. The Enrollment Census Extracts collect various types of student information including demographics, address and contact information, behavior events and program participation.

Report Logic

Students who have an Enrollment Status of W (Summer Withdrawal) will not report.

All Behavior Events report when the Event Date meets the following criteria:

- On or after the first instructional day of the selected calendar.
- On or before the Effective Date entered on the extract editor.

Generate the Discipline Extract

1. Select **Discipline** from the **Extract Type** dropdown list.
2. Enter an **Effective Date** in *mmdyyy* format or by clicking the calendar icon and selecting a date.
3. Select the **Format** in which the report should generate. Options are CSV and HTML.
4. If the student's legal name and gender information should report from the Protected Identity Information area, mark the **Report Legal Identities** checkbox.
5. Click **Generate Extract** to generate the report.
